

Execute data-driven ops to boost margin

Resilient manufacturing through unified data, real-time insights, scalable deployment

From reactive decisions to proactive, connected-data operations across the value stream

Unlock 10–20% productivity via connected data fabric

Strategic deployment of unified data platform to drive faster, trusted insights

From reactive to proactive operations through integrated data, automated reporting, and real-time asset analytics.

Shift to Proactive Ops: Data-Driven Transformation

Resilient manufacturing via unified data, real-time insights, and automated reporting

Showcase current gaps and quantified outcomes to justify rapid platform adoption.

Accelerate Margin with Data-Driven Operations

Resilient, enterprise-grade data platform for measurable ROI

From fragmented data to proactive, connected operations driving productivity and cost efficiency.

- Unify data fabric to trim silos
- Automate reporting for faster insights
- Real-time asset analytics to boost OEE
- Deliver 10–20% productivity uplift

Operational resilience through connected data

Link core capabilities to pains and outcomes for mid-market manufacturing.

- Unified data fabric reduces silos, ensures trusted metrics
- Automated reporting cuts manual effort, boosts accuracy
- Real-time asset analytics improves OEE and throughput
- Rapid deployment with scalable integrations and ROI visibility

Unified data fabric and real-time analytics drive proactive manufacturing

Unlock ROI via Connected Data for Ops

From reactive firefighting to proactive, data-driven manufacturing

10-20%

PRODUCTIVITY UPLIFT

5-10%

COST REDUCTION

30% faster

INSIGHT VELOCITY

- 10–20% productivity uplift
- 5–10% cost reduction
- 30% faster insights

Operational resilience through data-driven rollout

Strategic deployment plan to stabilize and scale performance

Phase 1

Phase 1: unify data sources, establish metrics

Phase 3

Phase 3: enable real-time asset analytics and insights

Phase 2

Phase 2: deploy automated reporting, dashboards

Phase 4

Measure: productivity uplift 10–20%, cost ↓ 5–10%

Operational Transformation ROI through Connected Data

Strategic investment yields measurable productivity, costs, and time-to-insight

10-20%

PRODUCTIVITY UPLIFT

5-10%

COST REDUCTION

30% faster

INSIGHT SPEED

- Unified data fabric enables trusted analytics
- Automated reporting reduces manual effort by 40%
- Real-time analytics lift OEE and throughput

Seal Commitment to Data-Driven Transformation

Operational resilience with measurable ROI and rapid deployment

Secure sponsorship and clear next steps to accelerate unified data platform adoption.

Unified Data Fabric for Proactive Operations

Integrated data backbone enabling real-time insights and rapid decision cycles

Demonstrate end-to-end integration model across ERP, MES, and PLM with automated reporting and real-time analytics.

ARCHITECTURE OVERVIEW

Connects ERP, MES, PLM into single source

Automates reporting; eliminates manual bottlenecks

Real-time asset and production analytics for OEE

Drives 10–20% productivity uplift and faster insights
