

PRUDENTIAL ZAMBIA — HERO

Prudential Zambia: WhatsApp-led Transformation

Centralized, automated customer engagement across insurance lifecycle

Prudential Zambia embarks on an enterprise-grade WhatsApp Commerce transformation to unify policy onboarding, renewals, payments, claims, and support. This cover sets the stage for a centralized, AI-assisted, CRM-integrated omnichannel experience designed to elevate retention, collections, and service efficiency.

PRUDENTIAL ZAMBIA — MARKET OPPORTUNITY

Prudential Zambia: WhatsApp-led Market Opportunity in Insurance

Prudential Zambia: Operational Challenges in Onboarding, Payments, Renewals & Support

01

Policy onboarding and lead follow-ups are split across agents and tools, causing delays

02

Premium reminders and renewal notifications rely on manual workflows and disconnected systems

03

Customer servicing lacks a centralized view, increasing SLA breaches and handoffs

04

Fragmented data across CRM, policy management, and payments slows decisioning

05

Inconsistent customer experience across channels hurts conversion and retention

06

Rising support costs due to duplicated effort and slow issue resolution

Prudential Zambia: Marichi WhatsApp Commerce Platform for Insurance Lifecycle

Tailored, enterprise-grade engagement across leads, onboarding, renewals, payments, and support

Marichi enables Prudential Zambia to unify customer conversations on WhatsApp, automate lifecycle workflows, and deliver proactive, compliant service with centralized analytics and payment capabilities. The flow highlights how use cases converge to measurable outcomes across onboarding, renewals, and servicing.

-20% **Average handle time**
Centralized claims and support visibility to improve SLA adherence

Prudential Zambia: Capabilities Mapped to Insurance Use Cases

Concrete Marichi features driving onboarding, renewals, payments, and support

This slide translates Prudential Zambia's key use cases into concrete Marichi capabilities, detailing how each feature enables faster onboarding, proactive renewal reminders, automated payments, and centralized claims communication.

WhatsApp-based lifecycle engagement

Consolidates customer conversations across agents and channels for a unified journey

Automated lead generation and qualification

Accelerates policy onboarding and reduces lead leakage

Automated premium reminders and renewal campaigns

Boosts renewals and cash flow with timely nudges

Claims and support automation with centralized view

Improves visibility, SLA adherence, and satisfaction

CRM and policy-management integrations

Gives agents a single source of truth across the lifecycle

Analytics and proactive engagement

Enables data-driven cross-sell, upsell, and service optimization

Prudential Zambia: WhatsApp Commerce End-to-End Flows

Deep dive into lead generation, onboarding, reminders, renewals, claims, and support workflows.

Prudential Zambia leverages Marichi WhatsApp Commerce Platform to orchestrate a single, automated end-to-end insurance lifecycle. This grid maps end-to-end flows from first touch to policy renewal, ensuring centralized visibility, faster response times, and improved customer satisfaction across agents and channels.

Lead generation and qualification

Automated conversations nurturing prospects into policy discussions

Policy onboarding

Guided, compliant onboarding with real-time CRM sync and policy data capture

Reminders and payments

Proactive premium reminders with secure in-channel payment options

Renewals

Automated renewal campaigns driving faster decisioning and cash flow

Claims and support

Centralized view for faster updates and SLA adherence

Cross-sell and upsell

Contextual offers during lifecycle moments to increase policy value

How Prudential Zambia Connects CRM, Policy Mgmt, Payments, and Analytics with Marichi

This architecture diagram highlights how Prudential Zambia's CRM, Policy Management System, Payment Gateway, Customer Support Platform, and Analytics connect via the Marichi WhatsApp Commerce Platform to deliver unified, automated customer journeys—from lead capture and onboarding to renewals, payments, and claims updates.

01 CRM to Marichi

Real-time customer context and engagement history feeding conversational workflows

02 Policy Management System

Policy data sync for accurate eligibility, coverage details, and renewal triggers

03 Payment Gateway

Secure, in-channel premium collection and receipt notifications within WhatsApp

04 Customer Support Platform

Centralized ticketing and SLA visibility across channels, powered by Marichi

05 Analytics Platform

Unified metrics, dashboards, and AI-driven insights across onboarding, renewals, and payments

Prudential Zambia: WhatsApp Commerce Impact on Insurance Lifecycle

This slide translates the Marichi-enabled capabilities into concrete, insurer-specific outcomes: higher renewal rates, faster collections, and quicker time-to-value. By centralizing lifecycle engagement on WhatsApp, Prudential Zambia can accelerate onboarding, improve payment adherence, and streamline claims communications, while maintaining regulatory compliance and customer trust.

- 01 **Step 1**
Onboarding and lead qualification moved to automated WhatsApp flows
- 02 **Step 2**
Automated renewal reminders and premium notifications
- 03 **Step 3**
Centralized claims and support with real-time SLA tracking
- 04 **Step 4**
Proactive collections through timed, personalized messages
- 05 **Step 5**
End-to-end analytics for visibility and optimization

BUSINESS IMPACT

Prudential Zambia: Phased WhatsApp Commerce Rollout

This timeline lays out a phased deployment of the Marichi WhatsApp Commerce Platform tailored to Prudential Zambia's insurance lifecycle. Each phase aligns with strategic objectives, owners, and measurable milestones to accelerate onboarding, improve renewals, and enhance customer support while managing regulatory and data privacy considerations.

Phase 1 — Foundation

Months 1–3

- Governance setup, data mapping, and privacy controls
- CRM, Policy Management, and Payments integration blueprint
- Channel and user access roles defined
- Pilot segment selection and success criteria

Phase 2 — Enablement & Onboarding

Months 2–4

- Lead generation and qualification automation
- Policy onboarding journey configured
- Agent workflows standardized
- Initial analytics and dashboards configured

Phase 3 — Payments & Renewals

Months 4–7

- Automated premium reminders deployed
- Renewal campaigns automated and tested
- Payment gateway integration completed
- Cash flow visibility dashboards activated

Phase 4 — Claims & Support Centralization

Months 6–9

- Centralized view for claims and support
- SLA tracking and escalation rules implemented
- Knowledge base and self-serve options expanded
- Cross-functional case management workflows tested

Prudential Zambia: Secure Multi-Channel Engagement Architecture

This slide outlines the data governance and security architecture for Prudential Zambia's multi-channel engagement strategy leveraging the Marichi WhatsApp Commerce Platform. It emphasizes regulatory alignment, role-based access, data minimization, encryption, and auditable data flows between CRM, Policy Management, Payments, and Support systems.

-
- 01

Data governance framework
Policies, roles, and responsibilities mapped to Prudential Zambia's regulatory requirements
-
- 02

Identity and access management
RBAC/ABAC, least-privilege access for agents and staff
-
- 03

Data classification and retention
Policyholder data segmented by sensitivity with defined retention schedules
-
- 04

End-to-end data encryption
In transit (TLS 1.2+) and at rest (AES-256) across channels and storage
-
- 05

Consent management and data privacy
Granular opt-in/opt-out controls and audit trails for communications
