

PRUDENTIAL ZAMBIA — HERO

Prudential Zambia: WhatsApp-Driven Transformation

Unified, automated customer journeys for onboarding, payments, renewals, and servicing via Marichi

Position Prudential Zambia at the forefront of digital engagement by placing WhatsApp Commerce at the center of the policyholder lifecycle—from lead capture to claim updates—driven by CRM, policy, and payments integrations.

PRUDENTIAL ZAMBIA — MARKET OPPORTUNITY

Prudential Zambia: WhatsApp Transformation for Lead-to-Renewal

Centralized, automated WhatsApp engagement to accelerate onboarding, payments, and renewals for Prudential Zambia

A narrative flow showing how Prudential Zambia can move from fragmented, manual communications to a unified, WhatsApp-driven lifecycle. The future state centers on automated onboarding, timely premium reminders, proactive renewal campaigns, and centralized servicing, all anchored in Prudential Zambia's policy management and CRM systems.

Prudential Zambia — Operational Pain Points

01

Lead generation and follow-up scattered across channels, slowing onboarding

02

Policy onboarding and data capture remain largely manual, delaying activation

03

Premium payment reminders and renewals lack automation, impacting collections

04

Disparate servicing and claims updates hinder centralized visibility and speed

05

CRM, policy management, and payments are not fully integrated, creating data silos

06

Inconsistent customer experience due to channel silos and delayed responses

Prudential Zambia: Marichi WhatsApp Platform as Orchestration Layer

Mapping Prudential Zambia use cases to Marichi capabilities with KPI anchors

Policy, payments, and communications in one feed

AI-driven conversation routing to reduce manual handoffs and speed responses

Prudential Zambia: Secure WhatsApp Commerce Architecture

This slide outlines Prudential Zambia’s secure integration backbone for the Marichi WhatsApp Commerce Platform, detailing data flows between CRM, Policy Management, Payments, and Support, with explicit governance and security controls for in-transit and at-rest data.

01 Data governance roles and access controls aligned to Prudential Zambia policy and regulatory requirements

02 End-to-end data flows
CRM ↔ Policy Management ↔ Payment Gateway ↔ Support, with tamper-evidence and audit trails

03 In-transit encryption (TLS 1.2+) and at-rest encryption across all integrations and data stores

04 Identity and access management
SSO, least-privilege principals, and role-based permissions

05 Compliance posture
Data retention policies, consent management, and audit readiness

Prudential Zambia: WhatsApp-Driven ROI & Efficiency

This slide quantifies the financial and service efficiencies gained by Prudential Zambia through Marichi WhatsApp Commerce Platform, focusing on claims handling, support automation, and cross-sell opportunities. It translates automated workflows into measurable impact on cash flow, SLA attainment, and policy value.

- 01 **Step 1**
Automate claims status updates via WhatsApp, reducing agent touches
- 02 **Step 2**
Route inquiries through AI-driven self-service to speed resolution
- 03 **Step 3**
Trigger cross-sell prompts during servicing flows to lift policy value
- 04 **Step 4**
Centralize payment reminders and follow-ups to improve on-time collections
- 05 **Step 5**
Consolidate servicing across policy, payments, and claims for unified visibility
