

Prudential Zambia Transforms with WhatsApp-First Engagement

Unified communications, automated onboarding, renewals, and collections powered by Marichi

Prudential Zambia embarks on a digital transformation to centralize policyholder engagement. Leveraging Marichi WhatsApp Commerce, the insurer will unify conversations, accelerate onboarding, and optimize renewals and payments across channels.

Prudential Zambia: WhatsApp-Driven Market Opportunity

As Prudential Zambia accelerates digital channels, centralizing WhatsApp engagement unlocks faster onboarding, automated renewals, and streamlined policyholder servicing.

01 Feature Name Channel fragmentation: Policyholders engage across agents and chat apps	02 Feature Name Manual workflows: Leads and onboarding require repetitive tasks
03 Feature Name Renewal friction: Reminders rely on manual follow-ups	04 Feature Name Visibility gaps: Disparate data hinders timely actions

Prudential Zambia: Operational Pain Points

Directly map current-state pains to fragmented processes and manual workflows hindering engagement, onboarding, renewals, and servicing.

01 Title Distributed communications: across agents and channels	02 Title Manual onboarding: high touch, slow cycle
03 Title Patchy renewal reminders: inconsistent timing	04 Title Fragmented servicing: poor centralized visibility

PRUDENTIAL ZAMBIA — SOLUTION OVERVIEW

Prudential Zambia: WhatsApp-Driven Policyholder Experience
