

PRUDENTIAL ZAMBIA — TRANSFORMATION OVERVIEW

Prudential Zambia Transforms to WhatsApp-Driven Engagement

Centralizing customer conversations, automating onboarding and renewals, and accelerating collections with Marichi WhatsApp Commerce Platform

Prudential Zambia moves from fragmented, manual customer interactions to a unified, proactive engagement engine. This slide presents the transformation goal: adopt a centralized WhatsApp channel to improve response times, increase policy renewals, and automate premium reminders, while maintaining regulatory compliance and enterprise-grade security.

Prudential Zambia: Centralized WhatsApp Channel Opportunity

A growing demand for compliant, high-trust digital engagement in Zambia is creating a sizable opportunity to centralize policyholder touchpoints. By unifying communications across onboarding, renewals, collections, and servicing on WhatsApp, Prudential Zambia can reduce manual workflows, shorten response times, and boost renewal and collection outcomes at scale.

Prudential Zambia — Key Operational Challenges

Distributed communications

Policyholders interact across agents and channels

Manual onboarding and lead follow-ups slow conversion and increase effort

Premium reminders and renewals are not fully automated, risking late payments

Customer servicing and claims updates lack centralized visibility and traceability

Fragmented data across CRM, policy management, and billing underpin a single customer view gap

Silos between sales, onboarding, and support drive delayed responses

Prudential Zambia: WhatsApp-Driven Automation & Engagement

Marichi enables lead generation, onboarding, reminders, renewals, claims, and support automation via WhatsApp

PROJECTED IMPACT

-25% Lead conversion time

-40% Policy onboarding cycle time

+15% On-time premium payments
