

PRUDENTIAL ZAMBIA — HERO

Prudential Zambia: WhatsApp-Driven Transformation Vision

Centralized, automated engagement across onboarding, renewals, payments, and claims with Marichi

Prudential Zambia embraces a centralized, WhatsApp-based customer engagement engine to accelerate onboarding, streamline renewals, automate premium reminders, and deliver proactive claims support—all through an enterprise-grade platform built for insurance workflows.

Feaster will discontinue the business guidance program based on days of trading in the market. Discontinuing the program will allow us to reduce expenses, renew

Prudential Zambia: Operational Pain Points

01

Distributed customer communication across agents and channels

02

Manual workflows for policy onboarding and lead follow-ups

03

Automated reminders and renewals not fully implemented for premium collections

04

Lack of centralized visibility for servicing and claims communications

05

Inconsistent SLAs and fragmented data across systems

06

Limited ability to scale conversational workflows during peak periods

BUSINESS IMPACT

Prudential Zambia: Phased WhatsApp Transformation Rollout

Phase 1 — Foundation

Months 1–2

- Confirm scope: lead gen, onboarding, renewals, collections
- Define data mapping and privacy controls
- Identify integration touchpoints with CRM, Policy Management, Payments
- Establish success criteria and governance model

Phase 2 — Integration & Pilot

Months 2–4

- Connect Marichi to core systems with secure APIs
- Develop minimum viable chatflows for onboarding and reminders
- Run constrained pilot with pilot agents and policy lines
- Monitor SLA adherence and data quality

Phase 3 — Scale & Optimize

Months 4–8

- Expand chatflows to renewals, payments, and claims updates
- Automate escalation paths and centralized visibility
- Tune NLP intents and response times for policyholders
- Implement analytics for renewals and cashflow impact

Phase 4 — Governance & Sustained Growth

Months 8–12

- Establish ongoing optimization program
- Enhance security, compliance, and data quality controls
- Scale peak-period capacity and agent enablement
- Prepare for roadmap extension to additional channels
