

PAYZEN — HERO

PayZen and BotFlow: AI-Powered Support, KYC & Scale

Tailored automation for PayZen's Southeast Asia payments platform

PayZen Market Challenge in Southeast Asia

High-volume payments, rapid onboarding, and strict compliance pressures demand scalable automation

PayZen operates in a rapidly expanding Southeast Asian fintech scene where processing speed, KYC accuracy, and cost-to-serve determine market leadership. Fragmented data, rising peak volumes, and evolving regulations create a compelling need for BotFlow’s scalable, compliant automation.

PayZen Pain Points in Support, KYC, Leads & Scale

01

Support bottlenecks slow issue resolution and SLA adherence

02

KYC onboarding drag increases time-to-activation for merchants

03

Lead conversion gaps reduce demo bookings and pipeline velocity

04

Retention gaps drive higher churn and lower lifetime value

05

Limited scalable infrastructure risks peak load performance

06

Siloed data across channels hinders unified view and faster decisions

BotFlow for PayZen: Use Case KPIs

AI-Powered
Support
First-contact

Campaigns
LTV Growth

PROJECTED IMPACT

-40% ATC/First Contact Time

+30% Lead to Demo Rate

-20% Peak Scale Resilience

PayZen x BotFlow: Capabilities Mapped to Use Cases

AI-POWERED SUPPORT BOT

Elevates first-contact resolution and reduces support load for PayZen customers

AUTOMATED KYC WORKFLOWS

Streamlines identity verification and onboarding at scale for PayZen

LEAD CONVERSION FUNNEL

Automates nurturing and qualification to accelerate PayZen's sales cycle

RETENTION CAMPAIGNS

Targets re-engagement and up-sell opportunities to grow PayZen LTV

SCALABLE INFRASTRUCTURE

Elastic bot capacity to handle peak volumes for PayZen's payments platform

OPERATIONAL EFFICIENCY

Orchestrates cross-functional data flows, lowering PayZen's cost-to-serve

PAYZEN — TECH ECOSYSTEM

BotFlow Integration with PayZen Systems

BotFlow weaves into PayZen’s fintech stack to automate support, KYC, marketing, and payments orchestration while maintaining compliance and data integrity.

01 CRM and marketing automation

Seamless data exchange for personalized journeys

02 KYC providers

Real-time identity checks synchronized with BotFlow workflows

03 Fraud and risk

Continuous risk signals informing decisioning

04 Payment gateway

Synchronized settlement and payout events with automation

05 Data warehouse

Unified analytics and governance for compliance

PAYZEN — PROCESS DONUT

PayZen Impact with BotFlow: Process ROI

- 01 **Step 1**
Map current support and KYC workflow bottlenecks
- 02 **Step 2**
Implement automated bot-driven triage and verification
- 03 **Step 3**
Accelerate onboarding with automated identity checks
- 04 **Step 4**
Orchestrate retention journeys and lifecycle messaging
- 05 **Step 5**
Scale operations during peak payment events
