

PRUDENTIAL ZAMBIA — CHALLENGE

Prudential Zambia: WhatsApp-Driven Digital Engagement with Marichi

Transforming policy onboarding, servicing, and payments through a single, compliant omnichannel channel

Prudential Zambia embarks on a digital transformation to unify customer communications, accelerate policy onboarding, automate premium reminders, and streamline servicing. Marichi WhatsApp Commerce Platform will position WhatsApp as the primary conversational channel, seamlessly integrating CRM, policy management, and payments to boost conversions, renewals, and agent productivity.

Prudential Zambia: Centralized WhatsApp Engagement for Life Insurance

Unified conversations across policy lifecycle unlock faster onboarding, better renewals, and improved collections

Prudential Zambia faces fragmented communications across agents and channels, manual policy onboarding, and inconsistent renewal reminders. By adopting Marichi WhatsApp Commerce Platform as the centralized channel, Prudential can streamline lead generation, policy issuance, and premium collections, delivering measurable improvements in conversion, cycle time, and customer satisfaction.

Prudential Zambia: Operational Pain Points in Engagement

Prudential Zambia currently experiences fragmented customer communication, manual policy onboarding, partial automation for payments, and limited centralized servicing visibility across channels and agents.

01

Distributed communication
Customer interactions spread across agents and channels

02

Manual onboarding workflows
Lead capture and KYC steps are not streamlined

03

Partial payments automation
Reminders exist but end-to-end payment coordination is inconsistent

04

Fragmented servicing visibility
No single view of policy status and inquiries across touchpoints

05

Operational inefficiency
Siloed data hampers timely decisions and escalations

06

Compliance risk exposure
Multi-channel messaging increases policy, data, and audit risks

Prudential Zambia: WhatsApp-driven Lifecycle with Marichi

Marichi enables Prudential Zambia to orchestrate end-to-end policy lifecycle interactions on WhatsApp. The flow highlights how lead capture, onboarding automation, timely reminders, and centralized servicing converge to improve conversions, issuance speed, renewals, and collections with a single, auditable channel.

Prudential Zambia: WhatsApp Capabilities by Use Case

Capability-by-use-case alignment with measurable impact

Detailed mapping of Marichi WhatsApp Commerce Platform capabilities to Prudential Zambia’s named use cases: lead generation, policy onboarding, premium reminders, renewals, claims servicing, and system integrations. Each block highlights the real-world impact on conversions, cycle times, and agent productivity.

01

Lead generation & qualification

Automate outreach and qualify prospects via WhatsApp to shorten the sales cycle

02

Policy onboarding automation

Capture applications and KYC data within a guided WhatsApp flow to accelerate issuance

03

Automated premium reminders

Timely, compliant reminders connected to the payment gateway to improve collections

04

Policy renewals & cross-sell campaigns

Targeted WhatsApp nudges with product offers to lift renewals and ARPU

05

Claims status & servicing automation

Centralized, real-time updates across touchpoints for faster resolutions

06

Integrations

CRM, Policy Management, Payment Gateway, and Support Platform for end-to-end workflow

Prudential Zambia: Use-Case Driven Flows & Automation

Unified WhatsApp-driven workflows across policy onboarding, payments, and servicing

BUSINESS IMPACT

Prudential Zambia — phased rollout plan for WhatsApp Commerce

This timeline outlines a phased rollout of Marichi WhatsApp Commerce Platform across Prudential Zambia. It captures governance, change management, and milestone-based delivery to accelerate onboarding, policy issuance, renewals, and payments while preserving compliance and data integrity.

Phase 1 — Phase 1

Months 1–2

- Set up governance framework and compliance controls
- Configure data flows between CRM, Policy Management, and Payments
- Launch pilot with limited agents and policies
- Establish KPIs and success criteria

Phase 2 — Phase 2

Months 3–6

- Enable lead gen, onboarding, and payment reminders
- Integrate core systems and automate servicing workflows
- Expand agent onboarding to additional regions
- Deploy analytics dashboard and SLA monitoring

Phase 3 — Phase 3

Months 7–9

- Roll out across all provinces
- Launch renewal campaigns and cross-sell programs
- Tune automation rules for policy types
- Improve agent productivity tools and AI prompts

Phase 4 — Phase 4

Months 10–12

- Advanced compliance monitoring and audit trails
- Scale AI-assisted servicing insights
- Enhance customer visibility across touchpoints
- Measure ROI and prepare for regional expansion

Prudential Zambia: Marichi WhatsApp Commerce Platform Pricing

Total cost of ownership, licensing, services, and ROI-aligned options for Prudential Zambia

This pricing slide outlines the investment and licensing structure for deploying Marichi WhatsApp Commerce Platform at Prudential Zambia. It presents base licensing, optional add-ons, services, and a ROI-driven value narrative aligned to lead gen, onboarding, payments, and servicing outcomes.

Base licensing: per-agent seat and core platform access

Channel: WhatsApp commerce, payments, and servicing modules

Professional services: implementation, data mapping, and onboarding

Ongoing support: SLA-based support tiers and uptime guarantees

Optional add-ons: advanced analytics, CRM/policy management integrations, and premium response workflows

ROI-driven assumptions: improved renewal rates, faster onboarding, and reduced case handling times

PRUDENTIAL ZAMBIA — QUOTE

Prudential Zambia: Prioritized Use Cases & Flow Steps

This slide maps Prudential Zambia’s top use cases into a concrete 2×2 flow. Each use case includes the step-by-step progression and the success signals that indicate measurable value against the Marichi WhatsApp Commerce Platform.

1

Lead generation & qualification

Initial WhatsApp conversation to capture interest and segment prospects

2

Policy onboarding automation

Seamless capture of applicant data, KYC steps, and policy setup

3

Automated premium reminders

Timely billing nudges and payment coordination via WhatsApp

4

Policy renewals & cross-sell campaigns

Proactive nudges with relevant offers to boost retention

Prudential Zambia: Expanded Use Cases for WhatsApp Commerce

Demonstrates how Prudential Zambia can leverage Marichi WhatsApp Commerce Platform to handle claims communication, automate customer support, and drive cross-sell/upsell throughout the policy lifecycle with a unified, compliant channel.

1

Claims status & servicing automation

Centralized updates across touchpoints to speed resolutions

2

Customer support automation

AI-assisted intents reduce handle time and improve first-contact resolution

3

Cross-sell & upsell campaigns

Contextual offers during servicing and claim milestones

4

Omnichannel governance

Policy, CRM, and payment data unified for compliant interactions

Marichi vs Legacy Channels — Prudential Zambia

A side-by-side view of how Marichi WhatsApp Commerce Platform changes Prudential Zambia's engagement: moving from fragmented, manual processes to a compliant, integrated, enterprise-grade flow that accelerates onboarding, payments, and servicing.

Capability	Old Way	New Way
Lead gen & qualification	✗ scattered touches across agents and channels	✓ centralized WhatsApp-driven funnel with automation
Policy onboarding	✗ manual capture & KYC steps	✓ automated, compliant onboarding
Premium reminders & renewals	✗ episodic reminders	✓ consistent, automated communications and payments
Servicing & claims	✗ siloed updates	✓ centralized, real-time status across touchpoints
Integrations	✗ point-to-point apps	✓ native CRM, Policy Mgmt, Payment Gateway, Support Platform
Analytics & ROI	✗ data silos, hard tracking	✓ end-to-end analytics for policy lifecycle and ROIs

PRUDENTIAL ZAMBIA — CLOSING THOUGHTS
