

PRUDENTIAL ZAMBIA — HERO

Prudential Zambia: End-to-End WhatsApp Engagement Transformation

Centralized, automated conversations for onboarding, renewals, and claims

Prudential Zambia is launching a bold digital transformation to standardize and accelerate interactions across policy onboarding, premium reminders, renewals, and claims using Marichi WhatsApp Commerce Platform. This cover sets the stage for enterprise-grade governance, seamless CRM and policy system integrations, and scalable conversational flows tailored to life insurance and financial services.

Prudential Zambia: Centralized WhatsApp Engagement Opportunity

One auditable, end-to-end channel for onboarding, servicing, and renewals

Prudential Zambia currently handles policy onboarding, premium reminders, and claims across dispersed agents and channels. A unified WhatsApp Commerce Platform enables auditable conversations, consistent policyholder experiences, and automated workflows that cut manual touchpoints and improve SLAs.

Prudential Zambia — Operational Pain Points

This slide identifies Prudential Zambia's four top operational pain points that hinder onboarding speed, premium collections, and centralized customer servicing. Each challenge ties to how WhatsApp-based automation can address the gap in governance, data visibility, and agent workload.

01

Fragmented customer communication across agents and channels

02

Manual, slow policy onboarding and lead follow-ups

03

Inconsistent premium reminders and renewal communications

04

Lack of centralized visibility for servicing and claims

Prudential Zambia: Marichi WhatsApp Flow for Onboarding & Servicing

Marichi WhatsApp Commerce Platform orchestrates Prudential Zambia’s life insurance journeys in a single channel. The flow connects lead generation, policy onboarding, premium reminders, renewals, and claims updates with enterprise-grade governance and CRM integrations.

Prudential Zambia: Marichi Capabilities by Use Case

Mapped capabilities unlock onboarding, renewals, and claims with centralized WhatsApp flows

This slide maps Prudential Zambia’s insurance use cases to Marichi WhatsApp Commerce Platform capabilities, showing how lead generation, policy onboarding, reminder campaigns, claims updates, cross-sell opportunities, and system integrations come together in a single, enterprise-grade channel.

01

Lead gen & qualification

WhatsApp flows convert inquiries to qualified leads within Prudential Zambia's channel

02

Policy onboarding automation

Guided WhatsApp journey collects data and issues policies faster

03

Automated premium reminders & renewals

Proactive messages with payment confirmations

04

Claims communication & status updates

Centralized updates with agent visibility

05

Cross-sell and upsell campaigns

Targeted recommendations within conversations

06

CRM/Policy Management/Payment Gateway integration

Unified data and payments across systems

Concentric Architecture for Prudential Zambia

This slide illustrates how Prudential Zambia’s Marichi WhatsApp Commerce Platform sits within a layered architecture. Outer ring represents external touchpoints, middle ring shows integration and processing, and the inner ring is the AI-driven intelligence core that coordinates policy, payments, and support data.

Outer Ring
Customer touchpoints via WhatsApp and mobile channels

Middle Ring
CRM, Policy Management, Payment Gateway, and Analytics integrations

Inner Ring
AI Core delivering policy onboarding, reminders, and claims updates

Data flows
Real-time sync between systems to enable centralized visibility

Prudential Zambia: Process Donut — Customer Experience, Renewals, Collections

Donut charts illustrate the tangible impact of a centralized, automated WhatsApp engagement flow on policyholder experience, renewal uplift, and premium collections for Prudential Zambia.

- 01 **Donut 1**
Onboarding Efficiency — Faster policy issuance and data capture
- 02 **Donut 2**
Renewal Uplift — Proactive reminders driving higher renewals
- 03 **Donut 3**
Collections Velocity — Increased timely premium payments
- 04 **Donut 4**
Support Resolution — Reduced handling time with centralized updates
- 05 **Donut 5**
Customer Satisfaction — More consistent policyholder experience

BUSINESS IMPACT

Prudential Zambia: 4-Phase WhatsApp Transformation Timeline

This timeline outlines four sequential phases to deploy Marichi WhatsApp Commerce Platform for Prudential Zambia. Each phase defines objectives, key owners, and dependencies to ensure a smooth transition from discovery through optimization.

Phase 1 — Discovery & Alignment

Months 1–2

- Confirm governance framework and security controls
- Define data mappings from CRM, Policy Management, and Payment Gateway
- Establish success metrics and reporting cadence
- Secure executive sponsorship and cross-functional team

Phase 2 — Pilot & Grow

Months 3–4

- Activate onboarding and premium reminders flows with a subset
- Validate data quality and real-time visibility for agents
- Iterate based on pilot feedback; tighten SLAs
- Document playbooks and operator training

Phase 3 — Scale & Integrate

Months 5–8

- Integrate Policy Management and Payment Gateway end-to-end
- Expand multi-channel engagement and centralized analytics
- Scale automation across renewals and claims communications
- Formalize change management and governance at scale

Phase 4 — Optimize & Expand

Months 9–12

- Enhance AI-assisted recommendations and cross-sell
- Optimize payment flows and retry logic for failures
- Institutionalize data quality and SLA monitoring
- Plan next wave of channels and product editions
