

PRUDENTIAL ZAMBIA — HERO

Prudential Zambia: Transformed WhatsApp Commerce & Engagement

Unified, automated, compliant interactions across life insurance and financial services

A bold introduction to Prudential Zambia's enterprise-grade WhatsApp commerce and engagement platform. This slide sets the vision for a centralized, automated customer experience that accelerates lead qualification, onboarding, renewals, and collections across life insurance and financial services.

Prudential Zambia: Centralized WhatsApp Engagement Opportunity

From fragmented touchpoints to a unified, automated, compliant channel

Prudential Zambia currently manages customer interactions across multiple agents and disparate systems, leading to delays in onboarding, reminders, and servicing. A centralized WhatsApp engagement model enables end-to-end Journeys for lead qualification, policy onboarding, premium reminders, renewals, and claims, driving faster conversions and stronger customer satisfaction.

Prudential Zambia — Operational Pain Points

Four explicit operational pains are undermining Prudential Zambia's ability to convert leads, onboard policies, collect premiums, and service customers efficiently across channels.

01

Fragmented customer communication across agents and channels

02

Manual workflows for policy onboarding and lead follow-ups

03

Premium payment reminders and renewal communications lack automation

04

Lack of centralized visibility for customer servicing and claims

Marichi WhatsApp Flow for Prudential Zambia

This flow demonstrates how Prudential Zambia leverages Marichi WhatsApp Commerce Platform to connect lead generation, onboarding, premium reminders, and claims support across CRM, Policy Management, Payment Gateway, and Support Platform with centralized visibility and governance.

Prudential Zambia: WhatsApp Commerce Capabilities

Capabilities mapped to Prudential Zambia use cases with measurable impact

Demonstrates how Marichi's WhatsApp Commerce Platform enables lead generation, onboarding, payments, renewals, and claims communication through a single, compliant channel with centralized visibility.

01

Lead Gen & Qualification

Automates inquiry capture and scoring within WhatsApp to surface high-potential prospects to agents

02

Policy Onboarding

Guided, compliant onboarding flows that collect required KYC and policy data directly in chat

03

Premium Reminders & Renewals

Automated, timely payment reminders and renewal notifications across channels

04

Claims & Support Communications

Centralized status updates and agent-assisted resolutions via WhatsApp for faster support

05

Cross-sell/Upsell Campaigns

AI-driven recommendations and proactive outreach embedded in conversations

06

Analytics & Governance

End-to-end visibility with governance controls across CRM, Policy Management, and Support

Prudential Zambia: Use Case Deep Dive for WhatsApp Commerce

Detailed walkthrough of Prudential Zambia's primary use cases for the Marichi WhatsApp Commerce Platform. Each use case includes the intended outcome and key KPIs to track success within a unified, compliant channel.

1

Lead Generation & Qualification

Automate initial contact, capture interest, and route to agents or CRM for rapid onboarding.

2

Policy Onboarding & Enrollment

Guide customers through policy setup in 3 minutes, with real-time status updates.

3

Premium Reminders & Renewals

Automated reminders across channels to boost on-time payments and reduce lapse risk.

4

Claims & Servicing Communications

Centralized updates on claim status, document requests, and response times.

Prudential Zambia: concentric architecture of Marichi WhatsApp Commerce Platform

A 3-layer concentric diagram illustrates how Prudential Zambia connects policy, payments, and support through Marichi on WhatsApp. Outer layer exposes channels and partners, middle layer orchestrates workflows and data flows, inner layer delivers AI-driven insights and governance for enterprise-scale operations.

Outer Ring
Channel & Data Ingress – WhatsApp-based interactions flow from customers and agents into Prudential Zambia systems

Middle Ring
Orchestration & Integration – Unified workflows connect CRM, Policy Management, Payment Gateway, and Support Platform

Inner Ring
Intelligence & Governance – Analytics, compliance controls, and policy-safe automation underpin all interactions

Security & Compliance
Enterprise-grade governance, role-based access, and audit trails across all touchpoints

DONUT IMPACT FOR PRUDENTIAL ZAMBIA

Prudential Zambia: Quantified Impact of WhatsApp Commerce

This slide translates Prudential Zambia’s transformation into measurable outcomes: engagement lift, increased renewals and collections, and faster support resolution through centralized visibility.

- 01 **Engagement uplift**
Measurable increase in lead qualification and onboarding efficiency via WhatsApp flows
- 02 **Renewals & collections**
Automated reminders driving higher renewal rates and timely premium payments
- 03 **Support efficiency**
Centralized visibility reducing handling time and improving first-contact resolution
- 04 **Operational cadence**
Data-driven insights enabling proactive engagement and policy servicing

BUSINESS IMPACT

Prudential Zambia: Staged WhatsApp Commerce Deployment Timeline

This implementation timeline outlines a phased rollout of the Marichi WhatsApp Commerce Platform for Prudential Zambia. Each phase delivers measurable milestones across lead generation, onboarding, premium reminders, renewals, and claims communications, with governance checks and risk controls at each stage.

Phase 1 — Phase 1

Months 1–2

- Architect data and integration strategy with CRM, Policy Management, and Payment Gateway
- Define chat governance, compliance mapping, and agent onboarding playbooks
- Pilot with 1 regional hub to validate lead capture, onboarding, and reminders

Phase 2 — Phase 2

Months 3–4

- Enable core onboarding flows and premium payment reminders across channels
- Launch centralized policy status visibility for agents and customers
- Stabilize automated communications with compliant templates and audit trails

Phase 3 — Phase 3

Months 5–7

- Scale servicing workflows to additional regions and renewals campaigns
- Introduce cross-sell/up-sell prompts within compliant conversation flows
- Enhance agent productivity with centralized dashboards and real-time alerts

Phase 4 — Phase 4

Months 8–12

- Roll out advanced analytics, AI-powered case routing, and SLA dashboards
- Continuous optimization based on performance metrics and agent feedback
- Governance and compliance review with external audit readiness

PRUDENTIAL ZAMBIA — PRICING & VALUE

Prudential Zambia Pricing & ROI – Marichi WhatsApp Commerce

Marichi vs. Generic Approaches for Prudential Zambia

A focused comparison showing how Marichi WhatsApp Commerce Platform delivers Prudential Zambia’s life insurance and financial services objectives with centralized, compliant, and automated engagement, versus generic solutions that fail to unify data, automate workflows, or scale for enterprise needs.

Capability	Old Way	New Way
Channel unification	✗ Fragmented channels across agents and systems	✓ Single, compliant WhatsApp engagement with centralized visibility
Lead to onboarding	✗ Manual, handoff-heavy processes	✓ Automated lead qualification and policy onboarding within WhatsApp
Reminders & renewals	✗ Partial automation	✓ End-to-end premium reminders and renewal campaigns
Policy & data visibility	✗ Silos in CRM/Policy Management	✓ Centralized data view across policy status and customer interactions
Payments & collections	✗ Disparate payment reminders	✓ Seamless payment reminders and gateway integration within flow
Analytics & governance	✗ Limited insights & audit gaps	✓ AI-powered workflows with enterprise governance and reporting

PRUDENTIAL ZAMBIA — FINAL CALL TO ACTION

Prudential Zambia: Pilot the WhatsApp Transformation

"A centralized, automated WhatsApp engagement model will accelerate policy conversions, renewals, and servicing—ship-ready for a pilot with Prudential Zambia."

This final slide invites Prudential Zambia to commit to a pilot of the Marichi WhatsApp Commerce Platform, tailoring CRM, Policy Management, and Payment Gateway integrations to your life insurance and financial services use cases. It reinforces the value of centralized visibility, compliant messaging, and automated workflows to drive faster decisioning and executive alignment.

Executive alignment: confirm pilot scope, success metrics, and timeline

Scope: lead generation, onboarding, reminders, renewals, and claims updates

Next steps: technical workshops, data readiness, and governance reviews
