

PRUDENTIAL ZAMBIA — TRANSFORMATION

Prudential Zambia: Enterprise WhatsApp Engagement Transformation

From fragmented touchpoints to a unified, compliant advisor-channel

Prudential Zambia moves to an enterprise-grade WhatsApp engagement layer that unifies policy onboarding, renewals, collections, and servicing. Marichi delivers a compliant, AI-powered conversational workflow with CRM integration to place WhatsApp as the primary channel for policyholders, agents, and prospects.

Prudential Zambia: Market Dynamics in Insurance Engagement

Unified WhatsApp engagement as the central channel to address fragmented legacy touchpoints

Prudential Zambia operates in a market where policyholders expect seamless, compliant, and timely communications across onboarding, renewals, and claims. Legacy channels—phone, email, and disparate CRM systems—create delays, inconsistent messaging, and missed renewal opportunities. A centralized WhatsApp engagement layer, integrated with policy, CRM, and payments, unlocks real-time interactions, reduces handling time, and improves NPS while accelerating onboarding and collections.

Prudential Zambia — Pain Points in Engagement

Prudential Zambia faces fragmented, manual engagement workflows across agents and channels. This slows onboarding, weakens renewal and collection velocity, and hinders centralized servicing visibility.

01

Customer communication scattered across agents and channels

02

Manual onboarding and lead follow-ups slow conversion

03

Automated payment reminders and renewals not fully in place

04

Lack of centralized servicing and claims visibility

05

Fragmented data across CRM, Policy Management System, and Support Platform

06

Limited real-time analytics for proactive renewals and collections

Prudential Zambia: End-to-End WhatsApp Orchestrated Journey

This flow showcases Prudential Zambia’s end-to-end engagement on Marichi WhatsApp Commerce Platform, weaving onboarding, policy servicing, premium reminders, and renewal campaigns into a single compliant sequence. Each step leverages CRM-integrated, AI-powered conversation workflows to reduce latency, improve conversions, and increase collections.

Prudential Zambia: WhatsApp Capabilities mapped to Use Cases

From leads to renewals, unified engagement across channels drives measurable outcomes

This slide connects Prudential Zambia’s use cases with Marichi WhatsApp Commerce Platform capabilities in a 6-capability grid, demonstrating concrete, outcome-oriented benefits for lead generation, onboarding, reminders, renewals, claims, and support.

01

WhatsApp-based omni-channel engagement

Consolidates customer communications into a single channel for agents and customers

02

Workflow automation for onboarding and follow-ups

Automates lead qualification and policy onboarding

03

Automated payment reminders and renewal campaigns

Ensures timely premium payments and policy renewals

04

Centralized servicing and claims communications

Single view of interactions across policies

05

CRM and Policy Management System integration

Seamless data flow for faster decisions

06

Analytics and governance

Real-time insights with compliance controls aligned to insurance regulations

Prudential Zambia: Centralized Engagement Architecture

Concentric layers illustrate how Prudential Zambia's CRM, Policy Management System, Payment Gateway, Support Platform, and Analytics Platform connect through Marichi WhatsApp Commerce Platform to deliver compliant, omnichannel engagement with automated workflows.

Outer Ring

Data & Channel Ingestion – Ingest customer intents and policy data from CRM, Policy Management System, and Payments gateway through secure, compliant channels.

Inner Ring

AI Core & Analytics – Real-time insights, policy health signals, and proactive engagement nudges surfaced to agents and customers.

Middle Ring

Orchestration & Compliance – AI-driven workflows coordinate onboarding, reminders, renewals, and claims with governance rules across channels.

Prudential Zambia: WhatsApp-Driven Engagement Impact

Donut view of how Marichi WhatsApp Commerce Platform transforms core insurance processes for Prudential Zambia, translating omnichannel engagement into measurable improvements in renewals, premium collections, and policy servicing SLAs.

- 01 Lead to Onboarding**

- 04 Claims & Servicing**
22% decrease in average handling time for claims inquiries
- 05 Agent Productivity**
40% more interactions resolved within first contact

BUSINESS IMPACT

Prudential Zambia WhatsApp Commerce Implementation Roadmap

This timeline outlines a practical, phased deployment of Marichi WhatsApp Commerce Platform for Prudential Zambia. It aligns onboarding, automation, and optimization initiatives with clear dates, responsibilities, and success metrics to accelerate renewals, onboarding, and collections.

Phase 1 — Phase 1 — Discover & Mobilize

Months 1–2

- Define program governance and data ownership
- Complete integration blueprint with CRM, Policy Management, and Payments
- Establish security, compliance and audit controls
- Set success metrics and reporting cadence

Phase 2 — Phase 2 — Onboarding & Automation Pilot

Months 2–4

- Deploy core WhatsApp templates and onboarding flows
- Automate lead qualification and initial policy onboarding
- Implement automated payment reminders for pilot cohort
- Create centralized servicing dashboard for pilot data

Phase 3 — Phase 3 — Scale & Optimize

Months 4–7

- Roll out full agent access and multi-channel orchestration
- Expand renewal campaigns and proactive notifications
- Integrate AI-assisted decisioning for next-best-action
- Tune workflows based on pilot learnings

Phase 4 — Phase 4 — Govern & Enhance Analytics

Months 7–9

- Institutionalize governance with policy controls and approvals
- Advance analytics for renewal and collections forecasting
- Improve data quality and cross-system visibility
- Establish continuous improvement rituals

PRUDENTIAL ZAMBIA — PRICING

Prudential Zambia Pricing & TCO Overview

Total cost of ownership and value realization timeline

Target: Automated reminders delivering faster collections and reduced aging receivables

Prudential Zambia: WhatsApp Use Cases with Measurable Outcomes

Detail the primary use cases Prudential Zambia will deploy on the Marichi WhatsApp Commerce Platform, with success criteria mapped to renewals, onboarding speed, and premium collections.

1

Lead generation & qualification

Qualify prospects via automated chats, move to policy onboarding within defined SLAs

2

Policy onboarding

Guided onboarding flow reducing manual data entry and time-to-issue

3

Premium payment reminders

Timely reminders driving on-time payments and reduced delinquencies

4

Policy renewal campaigns

Proactive renewal messaging to boost retention and cross-sell readiness

THREE-LAYER SECURITY AND DATA GOVERNANCE
FOR PRUDENTIAL ZAMBIA

Security, Compliance & Data Governance in Prudential Zambia WhatsApp Workflows

This architecture showcases how Marichi WhatsApp Commerce Platform enforces end-to-end security, encryption, access controls, and centralized governance to meet Prudential Zambia's insurance-specific regulatory requirements while enabling seamless agent and customer journeys.

01 Data segmentation & encryption

Protects policyholder data at rest and in transit across CRM, Policy Management, and Support platforms

02 Role-based access & audit trails

Ensures agent, supervisor, and IT actions are logged for compliance reviews

03 Centralized consent & data governance

Tracks consent, data retention, and cross-channel use for policyholders

04 Policy-centric incident response

Rapid containment and forensic readiness for any data/privacy events

05 Compliance-aligned messaging controls

Channel governance, templates, and approvals for secure communications

Prudential Zambia: ROI and Differentiation with Marichi

A side-by-side view of how Marichi's WhatsApp Commerce Platform delivers superior ROI and competitive differentiation for Prudential Zambia's life insurance and financial services operations, compared with legacy multi-channel approaches.

Capability	Old Way	New Way
Automation depth	❌ Limited orchestration across CRM, Policy Management, and Support	✅ End-to-end workflow automation tied to policy lifecycle
Onboarding speed	❌ Manual, siloed processes	✅ Automated lead qualification and policy onboarding
Reminders & renewals	❌ Inconsistent, manual reminders	✅ Timely, automated premium and renewal campaigns
Servicing visibility	❌ Fragmented channels	✅ Centralized view of interactions across policies
Compliance governance	❌ Reactive compliance checks	✅ Proactive, auditable governance across channels
Analytics & optimization	❌ Ad-hoc insights	✅ Real-time analytics driving proactive interventions
