

PRUDENTIAL ZAMBIA — TRANSFORMATION

Prudential Zambia Transforms with Marichi WhatsApp Commerce

A unified, enterprise-grade WhatsApp-based lifecycle for onboarding, payments, renewals, and claims

Prudential Zambia adopts the Marichi WhatsApp Commerce Platform to orchestrate lead capture, policy onboarding, premium reminders, renewals, and servicing across agents and channels. This cover sets the vision for a digital, centralized customer journey on a channel customers already use.

Prudential Zambia: Digital Engagement Market Context

Regulatory context and market dynamics shaping digital insurance journeys in Zambia

A centralized engagement layer is increasingly essential as policy onboarding, renewals, and claims communications move digital. Prudential Zambia must navigate regulatory requirements, data privacy, and multi-channel consumer expectations to enable compliant, end-to-end digital interactions across agents and customers.

Prudential Zambia — Key Pain Points

Prudential Zambia faces fragmented channels, manual onboarding and follow-ups, and inconsistent renewal communications that hinder a seamless customer journey and efficient operations.

01

Distributed customer communications across agents and channels

02

Manual policy onboarding and lead follow-ups causing delays

03

Premium reminders and renewals not fully automated

04

Lack of centralized visibility into servicing and claims communications

05

Data silos between CRM, policy systems, and payment gateways

Marichi WhatsApp Commerce Architecture for Prudential Zambia

Marichi orchestrates end-to-end WhatsApp-enabled flows that connect Prudential Zambia’s CRM, Policy Management System, and Payment Gateway. The dark flow visual demonstrates how lead capture, policy onboarding, premium reminders, renewals, and claims updates circulate through a centralized, compliant channel.

Prudential Zambia: WhatsApp Commerce Capabilities

Mapping Marichi capabilities to Prudential Zambia’s insurance use cases

- 03 **Average handling time**
22% decrease in total case resolution time
- 04 **Customer effort**
18-point NPS improvement projected over 12 months
- 05 **Agent workload**
28% reduction in manual follow-ups

BUSINESS IMPACT

Prudential Zambia:WhatsApp Commerce Platform Phased Rollout

This timeline outlines a phased implementation of the Marichi WhatsApp Commerce Platform for Prudential Zambia, detailing milestones, workstreams, and critical risk mitigations across 12 weeks, 6 months, and 9 months.

Phase 1 — Phase 1 – Foundations

Weeks 1–12

- Institute core integrations: CRM, Policy Management, Payment Gateway
- Launch pilot for lead gen, onboarding, and reminders with a subset of agents
- Establish data governance, security controls, and compliance checks
- Train key stakeholders and set up support model

Phase 2 — Phase 2 – Scale

Months 4–6

- Roll out automated onboarding and renewals across channels
- Expand to full agent network and cross-sell campaigns
- Enable centralized servicing view and claims updates
- Optimize performance with analytics and feedback loops

Phase 3 — Phase 3 – Maturation

Months 7–9

- Achieve end-to-end lifecycle automation for policy events
- Enhance AI-driven conversations and policy-aware workflows
- Stabilize operations with continuous improvement and rollback plans
- Finalize governance, SLA metrics, and ongoing enablement

Phase 4 — Risk & Readiness

Ongoing

- Monitor data quality and reconciliation across systems
- Manage change with training and agent enablement
- Mitigate technical debt with phased de-risking activities
- Review ROI and renewals performance quarterly

PRUDENTIAL ZAMBIA — PRICING

Prudential Zambia Pricing & Value

This slide quantifies the ROI and efficiency gains Prudential Zambia achieves by centralizing lead gen, onboarding, payments, renewals, and claims updates on the Marichi WhatsApp Commerce Platform. The metrics reflect cost savings, faster onboarding, improved retention, and elevated service levels across agents and channels.

Lead Gen & Qualification

1-2 words

Policy Onboarding

2 words

Automated Payments & Renewals

2 words

Centralized Servicing

2 words

PROJECTED IMPACT

-40% **Onboarding Time Reduction**
Lead gen and onboarding time reduced by streamlining WhatsApp flows

+25% **Renewal Completion Rate**
Renewals automated with proactive reminders to improve cash collection

-32% **Cost-to-Serve Reduction**
Policy servicing visibility across channels lowers inquiry handling time

Prudential Zambia Risk-Adjusted rollout plan with dependency mapping

This staggered Phased rollout outlines governance, risk controls, and change management activities aligned to Prudential Zambia’s WhatsApp Commerce Platform deployment. Each phase includes defined owners, milestones, dependencies, and risk gates to ensure a controlled, compliant, and rapid transformation across onboarding, renewals, payments, and servicing.

Phase 1 — Phase 1

Months 1–2

- Establish governance forum and risk register
- Define change mgmt plan and comms cadence
- Map dependencies with CRM, Policy Mgmt, and Payment gateways
- Set initial security and compliance controls

Phase 2 — Phase 2

Months 2–4

- Deploy pilot flows for lead capture and onboarding
- Implement risk gates and approval workflows
- Train agents and operations teams
- Validate data integrity across integrated systems

Phase 3 — Phase 3

Months 4–6

- Expand to renewals, reminders, and claims updates
- Enhance integration test suites and monitoring
- Refine governance controls based on pilot learnings
- Progressively roll out to additional regions/channels

Phase 4 — Phase 4

Months 6–9

- Full enterprise rollout across agents and channels
- Implement real-time visibility dashboards
- Tighten data reconciliation and audit trails
- Establish continuous improvement program

PRUDENTIAL ZAMBIA — EXECUTIVE ALIGNMENT

Prudential Zambia — Next Steps & Commitment

"We will formalize sponsorship and alignment to accelerate the WhatsApp Commerce transformation across Prudential Zambia."

This slide seals the commitment to move forward, codifies sponsor ownership, and outlines the executive milestones required to operationalize the Marichi WhatsApp Commerce Platform. It sets clear expectations for decision rights, timelines, and governance to ensure a rapid, enterprise-grade rollout across policy onboarding, renewals, and claims updates.

Executive sponsorship: Identify sponsor from Prudential Zambia leadership to approve budgets and governance

Formalized project charter: Define scope, success metrics, and acceptance criteria aligned to Prudential Zambia's strategic goals

RACI & governance: Establish decision rights, steering committee cadence, and cross-functional owners
