

PRUDENTIAL ZAMBIA — TRANSFORMATION JOURNEY

Prudential Zambia: WhatsApp-Driven Transformation

Unified, automated engagement across policyholders, agents and prospects

Prudential Zambia is adopting Marichi WhatsApp Commerce to centralize onboarding, renewals, payments, and servicing. This slide outlines how a single, compliant WhatsApp channel will orchestrate policy activation, reminders, and support, accelerating time-to-value and elevating customer satisfaction.

Prudential Zambia: WhatsApp Commerce Opportunity Landscape

Centralized WhatsApp engagement accelerates onboarding, renewals, and collections

A unified WhatsApp-driven journey enables Prudential Zambia to convert inquiries faster, onboard policyholders swiftly, and improve premium collections, all while providing real-time visibility across policy management, CRM, and support systems.

Prudential Zambia — Current Pain Points

Prudential Zambia currently coordinates customer interactions across multiple channels and legacy systems, leading to manual onboarding, fragmented reminders, and siloed servicing. This fragmentation drives delays, reduced conversion, and diminished customer satisfaction.

01

Channel fragmentation

Customer communications spread across agents, WhatsApp, email, and phone without a single view

02

Manual onboarding

Data capture and provisioning are heavy, slowing policy activation and lead conversion

03

Inconsistent reminders

Premium reminders and renewal notices lack automation and cross-channel consistency

04

Siloed servicing

Claims and service updates lack real-time visibility within policy and CRM systems

05

Data silos and inefficiency

Disconnected CRM, policy management, and payment data hinder analytics and decisioning

Prudential Zambia: WhatsApp Commerce Transformation Flow

Prudential Zambia leverages Marichi WhatsApp Commerce to orchestrate onboarding, renewals, payments, and claims communications through a unified, data-driven flow. This dark-flow slide visualizes how use-case domains connect to policy, CRM, and payment data to deliver real-time, compliant engagements for policyholders, prospects, and agents.

Prudential Zambia: WhatsApp Capabilities Aligned to Use Cases

Leveraging Marichi WhatsApp Commerce Platform to directly address Prudential Zambia's named use cases: lead generation and qualification, policy onboarding, premium reminders, renewal campaigns, claims communication, customer support automation, and cross-sell/upsell. Each capability maps to a measurable impact on policy activations, renewals, and customer satisfaction.

01

Lead Gen & Qualification

Qualify prospects in WhatsApp, reducing manual follow-ups and accelerating pipeline for Prudential Zambia.

02

Policy Onboarding Automation

Chat flows capture data and provision new policies faster, lowering time-to-first-value.

03

Automated Premium Reminders

Timely payment prompts across policy lifecycles to improve collections for Prudential Zambia.

04

Renewal Campaigns & Campaign Orchestration

Proactive, personalized renewal messages to lift retention and premium income.

05

Claims Communication

Centralized servicing conversations with policy data for faster resolution.

06

Customer Support Automation & Cross-sell/Upsell

Guided journeys with CRM/policy context enabling relevant offers.

Concentric Architecture: Marichi WhatsApp at Prudential Zambia

Prudential Zambia adopts a concentric-layer architecture to visualize how Marichi WhatsApp Commerce sits at the center of integrated systems. The outer ring represents customer touchpoints and data sources, the middle ring encapsulates core policy, payment, and support ecosystems, and the inner ring highlights the AI and analytics core driving real-time insights.

Outer Ring
Customer Touchpoints and Data Exchange with CRM and Policy Management

Middle Ring
Policy Management System, Payment Gateway, and Customer Support Platform integrations

Inner Ring
AI Core and Analytics Hub powering real-time insights and decisioning

Data Touchpoints
Secure, compliant data flows between Prudential Zambia systems and WhatsApp channels

Prudential Zambia: Quantified Impact of WhatsApp Commerce

Donut-based view showing Prudential Zambia's targeted improvements across four key KPIs: lead-to-policy conversion, policy onboarding speed, renewal rate, and customer satisfaction (CSAT). Each donut reflects the anticipated lift from deploying Marichi WhatsApp Commerce Platform across policy, CRM, and payment ecosystems.

- 01 **Lead-to-policy conversion**
Target improvement aligned with automated lead qualification and faster onboarding
- 02 **Onboarding speed**
Reduction in time-to-activate for new policies through chat-driven data capture
- 03 **Renewal rate**
Uplift from proactive renewal nudges and seamless payment prompts
- 04 **CSAT uplift**
Improved responsiveness and centralized servicing visibility

BUSINESS IMPACT

Prudential Zambia WhatsApp Commerce Implementation Timeline

A phased rollout tailored to Prudential Zambia, delivering quick wins in Phase 1 (Discovery and Pilot) and scalable expansion across policy products, channels, and regions. Each phase aligns with Prudential Zambia’s policy management, CRM, and payment integrations to accelerate onboarding, renewals, and servicing.

Phase 1 — — Discovery & Preparatory Readiness

Months 1–3

- Assess data hygiene, finalize integration plan with CRM, Policy Management, and Payment Gateway, and establish governance for compliance and data privacy

Phase 2 — — Integration & Automation Build

Months 4–6

- Connect WhatsApp flows to policy data, implement automated onboarding and renewal reminders, and enable centralized servicing queues

Phase 3 — — Pilot with Core Use-Cases

Months 7–10

- Run in-scope use cases for lead qualification, onboarding, premium reminders, and claims updates with a controlled group of policyholders and agents

Phase 4 — — Scale Across Products

Months 11–14

- Expand to all life policies and regions, extend to agents, and optimize AI-driven flow performance for upsell/cross-sell opportunities

PRUDENTIAL ZAMBIA — PRICING

Prudential Zambia: Tiered Pricing for Marichi WhatsApp

Transparent, enterprise-grade pricing aligned to value delivered

This pricing slide presents a tiered model for Marichi WhatsApp Commerce Platform tailored to Prudential Zambia's budget and objectives. It maps annual cost to expected uplift in policy onboarding, renewals, and servicing metrics, enabling a clear ROI narrative for executives and stakeholders.

Tier 1 — Core Engagement: Foundation for lead generation, onboarding, and reminders

Tier 2 — Growth Engagement: Expanded channels, automation, and claims support

Tier 3 — Enterprise Compliance: Full CRM/policy integrations, advanced analytics, and governance

Custom Add-Ons — Payments, AI-assisted insights, and premium support

ROI Alignment — Projected uplift in renewals and premium collections drives payback

Contract Terms — 12-month commitments with option to scale during term

PRUDENTIAL ZAMBIA — CLOSING REMARKS

Prudential Zambia — Alignment for WhatsApp Transformation

"This transformation requires clear ownership, consented timelines, and measurable milestones to accelerate policy onboarding, renewals, and claims support."

Prudential Zambia will establish a joint transformation charter with defined owners, milestones, and success metrics for the Marichi WhatsApp Commerce adoption. This closing slide confirms leadership alignment and the next steps to commence the initiative with dedicated sponsorship and cross-functional ownership.

Executive sponsorship and cross-functional governance established
Owners named for policy onboarding, renewals, and claims support
Agree timelines, milestones, and success metrics aligned to Prudential Zambia

PRUDENTIAL ZAMBIA — CLOSING REMARKS

CONFIDENTIAL & PROPRIETARY

Prudential Zambia: Lead Gen & Qualification via WhatsApp

In Prudential Zambia’s market, policy seekers arrive across multiple touchpoints. Automated WhatsApp capture and qualification converts interest into qualified leads faster, enabling agents to focus on high-potential prospects and shorten the time from first contact to policy activation.

1

Capture

WhatsApp-based lead capture collects contact details and basic needs in minutes

3

Route

Real-time handoff to the right agent or channel for follow-up

2

Qualify

Automated scoring based on policy interests, income, and timelines

4

Convert

Immediate next-step engagement to drive onboarding and quotes

Prudential Zambia: Policy Onboarding & Renewals in a WhatsApp World

This slide outlines the end-to-end policy onboarding flows and automated premium reminders and renewal notices for Prudential Zambia, showing how WhatsApp-based interactions integrate with the CRM and Policy Management System to reduce manual handoffs and accelerate time-to-value.

1

Onboarding

Capture customer data via guided WhatsApp flows that auto-provision new policies in the Policy Management System

2

KYC & document capture

Secure collection of required documents within the chat, synced to CRM

3

Policy activation

Real-time status updates and validation across policy lifecycle

4

Renewals

Automated reminders and payment prompts aligned with policy terms

PRUDENTIAL ZAMBIA — CHALLENGE

Prudential Zambia: Claims Communication and Cross-sell Upsell with WhatsApp

Claims updates build trust; timely offers grow wallet share

This slide demonstrates how Prudential Zambia can leverage Marichi WhatsApp Commerce to deliver real-time claims updates while presenting relevant cross-sell and upsell offers, reinforcing trust and increasing premium revenue.

- Real-time claims updates via WhatsApp reduce status inquiries
- Contextual product offers during claim moments boost cross-sell
- Centralized messaging ensures consistent policy and claim data
- Automated prompts support timely payments and policy activation
