

PRUDENTIAL ZAMBIA — CHALLENGE

Prudential Zambia: WhatsApp-Driven Transformation for Engagement

Unified, automated experiences across onboarding, renewals, payments, and support

Prudential Zambia aims to shift from fragmented, manual customer interactions to a unified, automated engagement engine. This cover sets the stage for a bold, enterprise-grade transformation using Marichi WhatsApp Commerce Platform to harmonize policy onboarding, renewals, collections, and claims communications.

How Prudential Zambia Can Unlock Digital Engagement

Centralized, automated WhatsApp-based engagement accelerates onboarding, renewals, and payments

Prudential Zambia faces a fragmented customer journey across agents and channels, leading to slower onboarding, inconsistent reminders, and delayed payments. A centralized WhatsApp-driven approach enables automated workflows, unified visibility, and faster cycle times from lead capture through policy activation to renewal.

Prudential Zambia: Key Pain Points Blocking Unified Engagement

Directly reflecting Prudential Zambia’s realities, this slide catalogs the fragmentation across agents and channels that hampers onboarding, renewals, and support, with clear impact on efficiency and cash flow.

01

Fragmented customer communication across agents and channels

02

Policy onboarding and lead follow-ups rely on manual workflows

03

Premium reminders and renewal notices are not fully automated

04

Customer servicing and claims lack centralized visibility

05

Data silos across CRM, policy management, and support tools

06

Delayed renewals increase lapse risk and drive higher DSO

Prudential Zambia: WhatsApp-Driven Engagement & Automation Flow

Marichi weaves Prudential Zambia’s policy onboarding, renewals, collections, and claims into a single, WhatsApp-centered flow. The end-to-end, integrated design ensures agents stay synchronized, customers receive timely reminders, and data remains centralized for faster issue resolution.

Prudential Zambia: WhatsApp Commerce Capabilities

Capabilities aligned to Prudential Zambia use cases for enterprise delivery

This slide maps each Marichi capability to Prudential Zambia’s listed use cases, illustrating tangible deliverables, outcomes, and how the platform enables end-to-end engagement across lead generation, onboarding, collections, renewals, claims, and support.

01

Lead Gen & Qualification

WhatsApp-based lead capture, qualification flows, and agent handoffs aligned to Prudential Zambia's sales motions

02

Policy Onboarding

Automated onboarding flows reduce manual steps and accelerate policy activation for new customers

03

Payment Reminders

Automated premium reminders and renewals to improve collections and reduce lapse risk

04

Renewal Campaigns

Journey orchestration across channels to drive timely renewals and sustained engagement

05

Claims Communication

Centralized claims status updates and servicing conversations for faster resolution

06

Support Automation & Integrations

Conversational support with CRM/Policy Management/Payment Gateway integrations

Concentric Architecture for Prudential Zambia

A white-background diagram shows Prudential Zambia’s Marichi WhatsApp Commerce Platform at the center, surrounded by its key enterprise systems —CRM, Policy Management, Payment Gateway, Customer Support, and Analytics. The three concentric rings illustrate data flows and integration touchpoints that enable unified policy onboarding, renewals, payments, and claims communication through WhatsApp.

Prudential Zambia: Quantified Impact from WhatsApp Commerce

This slide translates Prudential Zambia's WhatsApp-based commerce and automation capabilities into concrete, measurable outcomes. It highlights expected shifts in policy renewals, premium collections, and service response efficiency, aligned to your key KPI targets.

- 01 **Renewals uplift**
Target improvement in renewal rate and reduced lapse risk
- 02 **Collections acceleration**
Higher on-time premium payments and lower DSO
- 03 **Servicing efficiency**
Faster response times and improved agent productivity
- 04 **Customer experience**
Stronger satisfaction signals tied to centralized communications

BUSINESS IMPACT

Phased Implementation Plan for Prudential Zambia

This slide outlines a phased rollout tailored to Prudential Zambia’s insurance context, emphasizing governance, change management, and measurable milestones across discovery, integration, pilot, scale, and optimize phases.

Phase 1 — Foundation (Months 1–2)

Months 1–3

- Establish governance, define success metrics, and gather requirements from policy onboarding, renewals, and claims teams

Phase 2 — Integration (Months 2–4)

Months 4–6

- Connect CRM, Policy Management, and Payment Gateway to enable unified data flows and centralized visibility

Phase 3 — Pilot (Months 4–6)

Months 7–10

- Run limited WhatsApp-based onboarding, reminders, and claims updates with a controlled agent group

Phase 4 — Scale (Months 6–9)

Months 11–14

- Expand to all channels and regions, lock in automation for renewals and payments, and enable cross-sell campaigns

Prudential Zambia: WhatsApp Commerce Platform Pricing

Enterprise pricing aligned to a \$100K–\$250K USD annual budget

This pricing slide outlines a scalable, enterprise-grade investment for Prudential Zambia, detailing licensing, tiers, and services that align with your 100K–250K USD budget range.

The structure supports predictable total cost of ownership while enabling phased adoption across policy onboarding, renewals, collections, and claims communications.

Pricing Tiers: Core, Growth, and Enterprise aligned to feature access and support

Licensing Model: Per-user and usage-based components with volume discounts

Included Services: Implementation, onboarding, training, and ongoing success management

Integrations: CRM, Policy Management, Payment Gateway, and Support Platform included

Roadmap Alignment: Phased rollout options over 12–18 months with measurable milestones

Total Cost of Ownership: Clear upfront, predictable recurring fees, and optional add-ons

PRUDENTIAL ZAMBIA — CHALLENGE

Prudential Zambia: Executive Sponsorship & Next Steps

We invite Prudential Zambia to sponsor a 90-day pilot of Marichi WhatsApp Commerce Platform to accelerate onboarding, collections, and claims visibility.

This slide invites executive sponsorship from Prudential Zambia and outlines the immediate actions to move into a formal pilot. The goal is to secure commitment for executive sponsorship, define success metrics, and align on a concrete, time-bound next steps plan.

Executive sponsor alignment: confirm senior sponsor and operating owner at Prudential Zambia.

Pilot scope and success metrics: onboarding time, renewal rate uplift, and collections KPI targets.

Data and compliance readiness: align CRM, policy management, and payment gateway integrations.

CONFIDENTIAL & PROPRIETARY

Prudential Zambia: Dark Steps to WhatsApp-Driven Growth

This slide deep-dives Prudential Zambia's top use cases with a 2×2 dark steps flow. Each step outlines the concrete actions, data touchpoints, and cross-channel handoffs required to move customers from initial interest to renewed policy engagement through Marichi WhatsApp Commerce Platform.

1

Lead Gen

Capture and qualify prospects via WhatsApp with automated routing to agents

2

Onboarding

Automate policy activation and document collection within a guided flow

3

Reminders

Automated premium and renewal nudges with real-time payment status

4

Renewals

Proactive retention messages plus seamless renewal payments and cross-sell prompts

Prudential Zambia: Compliance and Governance Capabilities

Security, governance and auditability built for enterprise insurance

This slide highlights the governance, security, data residency, and auditability features of the Marichi WhatsApp Commerce Platform, tailored to Prudential Zambia’s regulatory and risk management needs. It demonstrates how centralized controls and documented processes support compliant onboarding, renewals, payments, and claims communications.

01

Role-Based Access Control (RBAC)

Fine-grained permissions ensure users access only what they need

02

Data Residency Controls

Data stored within recognized regional boundaries to meet local regulations

03

Audit Logs and immutable records

End-to-end event trails for policy actions, payments, and communications

04

Compliance Playbooks

Predefined policy and claims workflows aligned with Prudential Zambia governance

05

Policy Encryption at Rest and in Transit

Strong cryptography protecting sensitive customer data

06

Vendor and Third-Party Governance

Registered integrations with documented security posture

Operational Readiness and Support Model for Prudential Zambia

This slide defines the operational readiness framework for Prudential Zambia’s Marichi deployment, outlining the support model, monitoring cadence, and service level commitments across Platform, Integrations, Data, and Operations layers.

Operations governance

Defined support roles, RACI, and handoffs between IT, Compliance, and Business Units

Monitoring & observability

Unified dashboards for incident detection, health checks, and SLA adherence

SLAs & reliability

Response, resolution, and uptime targets aligned to policy onboarding, renewals, and claims flows

Change & release management

Structured deployment windows, rollback plans, and validation gates

Prudential Zambia: ROI and Efficiency from WhatsApp Commerce

Targeted renewals lift, faster collections, and streamlined servicing

A focused view of how Marichi WhatsApp Commerce Platform delivers measurable ROI for Prudential Zambia by accelerating onboarding, improving renewal adherence, reducing DSO, and lowering average handling time.

PROJECTED IMPACT

+22% **Renewals lift**
Renewal lift: baseline → target uplift quantified by policy count and timing

-8 days **DSO reduction**
DSO reduction: days-sales-outstanding improved through automated reminders and payments

-35% **Average Handling Time**
AHT improvement: faster case resolution via centralized, omnichannel servicing

PRUDENTIAL ZAMBIA — CLOSING REMARKS

Prudential Zambia: Next Steps for WhatsApp Commerce Transformation

| *"The journey to a unified, automated engagement engine starts now."*

This closing slide reinforces executive commitment to the Prudential Zambia Digital Transformation initiative and outlines the immediate actions required. It positions Marichi WhatsApp Commerce Platform as the backbone for onboarding, renewals, payments, and claims communications, with clear ownership and milestones.

Executive sign-off on the Digital Transformation Roadmap for Prudential Zambia
Confirm scope: CRM, Policy Management, Payment Gateway, and Support Platform integrations
Approve governance, compliance checks, and AI-driven conversation standards
