

PRUDENTIAL ZAMBIA — DIGITAL ENGAGEMENT VISION

Prudential Zambia: WhatsApp as the Preferred Digital Channel

Unified, proactive engagement across onboarding, servicing, and renewals

Prudential Zambia will consolidate customer interactions on WhatsApp, enabling automated onboarding, timely renewal reminders, and centralized servicing. This shift reduces handoffs, accelerates policy activation, and drives higher renewals and collections at scale.

Prudential Zambia: Unified WhatsApp Engagement Opportunity

Today, Prudential Zambia faces fragmented customer communications across agents and channels, leading to slower onboarding and uneven renewal performance. By shifting to a unified WhatsApp engagement layer, Prudential Zambia can streamline policy onboarding, accelerate renewals, and deliver proactive servicing at scale.

Prudential Zambia — Key Operational Challenges

Prudential Zambia struggles with dispersed customer conversations across agents and channels, manual policy onboarding workflows, inconsistent premium reminders, and lack of centralized visibility into servicing and claims.

01

Distributed communications

Customer interactions span multiple agents and channels, causing delays and inconsistency

02

Manual onboarding

Lead capture and policy initiation rely on manual, disjointed workflows

03

Reminders not fully automated

Premium payment and renewal communications are afterthoughts rather than proactive campaigns

04

Lack of centralized visibility

Servicing and claims lack a single, unified view across policies

Prudential Zambia: WhatsApp-Driven Engagement & Automation Flow

This slide illustrates how Marichi WhatsApp Commerce Platform orchestrates data across CRM, Policy Management System, and Support tools to enable seamless, automated policy onboarding, proactive renewal reminders, and centralized servicing for Prudential Zambia.

Prudential Zambia: WhatsApp Capabilities Mapped to Use Cases

Consolidated capabilities powering lead capture, onboarding, renewals, and servicing on WhatsApp

This slide maps Marichi WhatsApp Commerce Platform capabilities directly to Prudential Zambia’s named use cases, showing how each feature enables unified, proactive engagement across onboarding, renewals, payments, and claims support.

01

Lead capture & qualification

WhatsApp-based forms and guided chats to collect leads with real-time scoring

02

Automated policy onboarding workflows

Guided conversations, document collection, and compliance checks

03

Automated premium reminders & renewal campaigns

Timely messages, payment links, and status tracking

04

Centralized servicing & claims communications

Unified policy/claim visibility with status updates

05

Payments & integrations

Seamless payment gateway steps embedded in chats, with CRM and policy system sync

06

Omni-channel orchestration

Single conversation thread across CRM, Policy Management, and Support platforms

Concentric WhatsApp Architecture for Prudential Zambia

This slide shows how Marichi weaves Prudential Zambia's CRM, Policy Management System, Payment Gateway, Support Platform, and Analytics into a cohesive, concentric architecture. Outer rings handle data ingress and channel orchestration, middle rings enable policy and payment workflows, and the inner core delivers intelligence and decisioning for servicing and renewals.

Policy & CRM sync
Real-time data harmonization across systems

Workflow orchestration
Guided onboarding, renewals, and payments

Analytics & AI core
Insight-driven decisions for proactive outreach

Unified servicing
Centralized view for claims and support queues

BUSINESS IMPACT

Prudential Zambia Phased WhatsApp Transformation Timeline

This phased rollout plan maps Milestones, owners, and critical dependencies for Prudential Zambia as it unifies onboarding, servicing, and renewals on WhatsApp using the Marichi platform. Each phase delivers measurable value in policy activation, renewals, collections, and customer support throughput.

Phase 1 — Phase 1

Q1-Q2

- Establish governance and success metrics
- Map integrations: CRM, Policy Management, Payments
- Define data privacy and consent controls
- Identify owner groups and RACI

Phase 2 — Phase 2

Q2-Q3

- Enable WhatsApp channels and opt-in flows
- Prototype agent handoffs and escalation rules
- Integrate with CRM for unified contact history
- Pilot with a controlled pilot group

Phase 3 — Phase 3

Q3-Q4

- Launch automated policy onboarding flows
- Automate document collection and verification
- Activate policy activation with back-end sync
- Measure onboarding time and drop-off reductions

Phase 4 — Phase 4

Q4-Q1 (Year 2)

- Roll out centralized servicing view
- Proactive status updates for claims and payments
- Integrate status visibility across channels
- Train agents on proactive servicing playbooks
