

PRUDENTIAL ZAMBIA — CHALLENGE

Prudential Zambia: Unified WhatsApp- Powered Transformation Blueprint

Connecting onboarding, renewals, collections and servicing through Marichi's enterprise WhatsApp platform

A tailored blueprint for Prudential Zambia to consolidate policy onboarding, reminders, premium collections, and support into a single, compliant WhatsApp-driven engagement hub. This cover sets the stage for a digital-first journey that aligns with Prudential Zambia's regulatory needs and multi-channel operations.

Prudential Zambia: Centralized WhatsApp Engagement in Market Opportunity

Prudential Zambia operates in a market where customers expect real-time, personalized updates and consistent service across agents and channels. Regulatory expectations in Zambia demand compliant, auditable communications, making a centralized WhatsApp engagement hub essential for scalable life insurance distribution and servicing.

Prudential Zambia — Operational Pain Points

Prudential Zambia faces multi-channel, manual workflows that slow onboarding, renewal reminders, and servicing. Communications are dispersed across agents and systems, creating visibility gaps and delays in collections and claims support.

01

Distributed communications

Lead qualification, onboarding, and servicing occur across agents and channels

02

Manual onboarding and follow-ups

Policy onboarding and lead nurturing rely on repetitive human effort

03

Automation gaps for reminders

Premium payment reminders and renewal notices are not fully automated

04

Lack of centralized visibility

Servicing and claims communications lack a single, auditable view

05

Data fragmentation

CRM, Policy Management System, and Support Platform hold inconsistent data

06

Slow value realization

Onboarding and engagement improvements take longer due to siloed processes

Prudential Zambia: Marichi WhatsApp Commerce Flow

Marichi WhatsApp Commerce Platform serves as the centralized engagement layer for Prudential Zambia, orchestrating policy onboarding, renewal reminders, premium collections, claims and support, across agents and channels within a single WhatsApp-first experience.

Prudential Zambia Capabilities Map

Capability-to-use-case alignment for enterprise WhatsApp engagement

Prudential Zambia’s use cases span lead generation, policy onboarding, reminders for renewals and payments, claims, and proactive support. This icon-grid highlights the exact Marichi capabilities that map to each use case with CRM, policy management, payments, AI flows, and analytics at the core.

01

CRM + Policy Management Integrations
Centralizes policy, customer, and interaction data across channels

02

WhatsApp Commerce & Automation
Automates onboarding, reminders, renewals, and support workflows

03

AI-powered Conversational Flows
Qualifies leads, handles inquiries, and supports policy queries at scale

04

Payments & Premium Collections
Seamless payment experiences integrated with policy data

05

Analytics & Insights
Real-time dashboards for agent productivity and customer journey optimization

06

Cross-Channel Orchestration
Unified view across WhatsApp, SMS, and agent channels

Concentric Architecture for Prudential Zambia's WhatsApp Platform

This slide presents Prudential Zambia's layered architecture, illustrating how WhatsApp-based engagement sits atop data, workflow orchestration, and intelligent services, all while maintaining compliance with policy, payment, and support integrations.

Specific Capability 1

Real-time synchronization across CRM, Policy Management System, and Payment Gateway

Specific Capability 3

AI-powered conversational routing and escalation within policy and claims contexts

Specific Capability 2

Centralized visibility for agent workflows and customer interactions

Specific Capability 4

Secure, compliant data handling with governance controls

Prudential Zambia: ROI-Driven Onboarding, Renewals & Collections

This slide translates Prudential Zambia's WhatsApp-powered transformation into tangible ROI levers. It highlights how accelerated onboarding, higher renewal rates, proactive payment reminders, and streamlined servicing contribute to faster time-to-value and improved cash collection.

- 01 **Onboarding speed**
Time-to-activate reduces from lead capture to policy issue
- 02 **Renewal effectiveness**
Automated reminders increase renewal enrollment
- 03 **Payment reminders**
Timely prompts reduce delinquencies and improve collections
- 04 **CSAT impact**
Faster, clearer servicing lowers complaint rates

BUSINESS IMPACT

Phased WhatsApp Transformation for Prudential Zambia

A staged deployment plan that aligns with Prudential Zambia’s digital maturity, prioritizing onboarding, renewals, and collections while ensuring regulatory compliance and governance at every gate.

Phase 1 — Foundation

Months 1–3

- Establish data harmonization between CRM, Policy Management, and ERP/payments
- Set up core WhatsApp workflows for onboarding and renewals
- Define governance model, risk controls, and compliance checks
- Pilot in one region with limited agent pool to validate end-to-end flows

Phase 2 — Delivery

Months 4–6

- Scale WhatsApp channels to all regional agents
- Automate premium reminders, renewal notices, and basic servicing
- Integrate payment gateway for real-time collections tracking
- Enhance reporting with centralized visibility dashboards

Phase 3 — Optimization

Months 7–9

- Improve AI-driven intents for inquiries and qualification
- Migrate complex workflows to automation engine with error handling
- Implement agent productivity tools and escalation paths
- Conduct value realization review and adjust KPIs

Phase 4 — Sustainment

Ongoing

- Continuous governance reviews and risk management
- Periodic training refreshers and playbook updates
- Scale improvements based on feedback and performance data
- Regulatory and data privacy compliance audits

PRUDENTIAL ZAMBIA — PRICING

Prudential Zambia Pricing Model — Marichi Platform

Transparent, scalable pricing aligned to Prudential Zambia's budget and growth plan

This pricing blueprint presents a clear, enterprise-grade investment aligned to Prudential Zambia's 100K–250K USD budget envelope. It maps value realization milestones to the timing of onboarding, renewals acceleration, and servicing automation, ensuring predictable ROI for policy onboarding, collections, and claims communications.

Usage-based tiers: per active policy, with a downloadable cost estimator for renewals and onboarding

Fixed enterprise core: platform access, CRM integrations, and compliance tooling included

Add-ons for scale: premium automation packs, payments integration, and advanced analytics

Implementation runway: phased rollout with 60/90/120-day milestones aligned to Prudential Zambia goals

PRUDENTIAL ZAMBIA — TRANSFORMATION COMMITMENT

Prudential Zambia: Next Steps to Pilot the WhatsApp Transformation

"We commit to a formal evaluation and pilot alignment to unlock unified engagement, faster onboarding, and timely collections."

Honoring Prudential Zambia's commitment to a unified, automated WhatsApp engagement hub, this slide outlines the immediate next steps to move from discussion to a scoped pilot. The aim is to secure executive alignment and finalize the pilot plan with clear success criteria and timelines.

Executive alignment: Confirm sponsorship, success metrics, and risk mitigations

Pilot scope: Define policy onboarding, renewal reminders, and collections workflows

Data & integrations: Align CRM, Policy Management System, and payment gateway connections

CONFIDENTIAL & PROPRIETARY

Prudential Zambia: WhatsApp Lead Gen to Onboard Velocity

A structured 2×2 dark_steps flow highlights how Prudential Zambia can convert WhatsApp-driven interactions into qualified leads and rapid policy onboarding. Each step builds toward a faster time-to-value by aligning agent handoffs and automated onboarding.

1

Step 1 – Lead Capture

Capture inquiries via WhatsApp with intelligent routing to Prudential Zambia agents

3

Step 3 – Handoff to Agent

Seamless transition to human or hybrid agent for personalized engagement

2

Step 2 – Early Qualification

AI-assisted triage to determine policy interest and eligibility

4

Step 4 – Onboarding Kickoff

Guided onboarding flow with compliance checks and documents

Prudential Zambia: Onboarding & Reminders Automation

Baseline vs Target: onboarding time lowers; renewal reminders improve conversion

This flow KPI slide demonstrates how Prudential Zambia leverages Marichi WhatsApp Commerce Platform to automate policy onboarding and premium reminders, reducing manual touchpoints for distributed agents and accelerating conversions across regions.

PROJECTED IMPACT

-40% **Onboarding Cycle Time**
Onboarding Journey: Automate lead capture through WhatsApp, auto-qualify, and route to the right policy product

+25% **Reminders Hit Rate**
Premium Reminder Cadence: Timely, automated messages for due premiums and renewals across channels

+15% **Lead-to-Policy Conversion**
Agent Collaboration: Centralized visibility for field agents and support staff

Prudential Zambia: Enterprise-Grade WhatsApp Commerce vs. Legacy

A focused comparison of capabilities shows how Marichi WhatsApp Commerce Platform delivers deep integrations, strict compliance, and scalable enterprise operations for Prudential Zambia, replacing fragmented, manual multi-channel workflows.

Capability	Old Way	New Way
Integration depth	Real-time CRM + Policy Management + Payments	Real-time, bi-directional data sync across CRM, policy, and payments
Compliance & governance	Fragmented controls	Centralized policy adherence, audit trails, and regulatory reporting
Channel reach	Multi-channel fatigue	Single, trusted WhatsApp-powered engagement hub for policy onboarding, renewals, and support
Agent productivity	Manual handoffs	Automated workflows that route inquiries, leads, and payments to the right agent instantly
Member experience	Slow, inconsistent updates	Real-time, personalized updates across onboarding, reminders, and claims
Scale & resilience	Limited by silos	Enterprise-grade scalability with centralized analytics and SLA-driven support

Total Cost of Ownership — Prudential Zambia & Marichi

A concise comparison of ongoing costs versus the value delivered by Marichi WhatsApp Commerce Platform for Prudential Zambia's integrated engagement, policy management, and payments workflows.

Capability	Old Way	New Way
Integrations	❌ Custom point-to-point builds	✅ Native CRM, Policy Mgmt, and Payments integrations
Maintenance	❌ Reactive fixes across multiple systems	✅ Centralized maintenance with shared services
Change Management	❌ Slow, siloed adoption	✅ Streamlined, enterprise-grade governance and training
Platform Upgrades	❌ Uncoordinated upgrades	✅ Coordinated release trains with backward compatibility
Security & Compliance	❌ Ad-hoc controls	✅ End-to-end compliance baked-in (regulatory, data, payments)
Operational Overhead	❌ Manual data reconciliation	✅ Automated data sync and single source of truth

Prudential Zambia Implementation Governance & Milestones

A phased, risk-aware rollout of the Marichi WhatsApp Commerce Platform for Prudential Zambia, with clear governance cadences, success metrics, and risk mitigations aligned to policy onboarding, renewals, collections, and servicing.

Phase 1 — Phase 1 – Foundations

Months 1–2

- Establish governance bodies: steering committee, risk owners, IT security liaison
- Complete data inventory, mapping across CRM, Policy Management, and payments
- Define security controls, access management, and audit trails
- Draft risk register with initial mitigations and rollback plan

Phase 2 — Phase 2 – Pilot & Controls

Months 3–4

- Run controlled pilot with a limited set of policies and agents
- Develop success criteria, SLAs, and incident response playbooks
- Validate data integrity between policy system and CRM
- Implement pilot-specific dashboards for real-time risk monitoring

Phase 3 — Phase 3 – Scale & Integrations

Months 5–8

- Complete CRM, Policy Management, and Payment Gateway integrations
- Automate onboarding, renewals, and collections workflows at scale
- Roll out enterprise-grade monitoring, alerts, and anomaly detection
- Formalize change management and regulatory compliance reviews

Phase 4 — Phase 4 – Optimization & Compliance

Months 9–12

- Optimize engagement models based on outcomes and customer feedback
- Conduct internal and external audits; verify control effectiveness
- Institutionalize governance cadence: quarterly reviews and annual policy
- Plan for continuous improvement and future-ready capabilities
