

PRUDENTIAL ZAMBIA — TRANSFORMATION

Prudential Zambia: Transforming Engagement with Marichi WhatsApp

Unifying policy, payments, and servicing through enterprise-grade conversations

Introducing Prudential Zambia's digital transformation powered by Marichi WhatsApp Commerce Platform. A customer-centric journey that places WhatsApp at the core of policy onboarding, premium reminders, renewals, and centralized servicing.

Prudential Zambia: Market Opportunity for Enterprise WhatsApp Engagement

Consolidating customer communication across life insurance and financial services in Zambia

Prudential Zambia faces a fragmented communications landscape across agents, policy management, and servicing. Enterprise-grade WhatsApp engagement via Marichi enables a unified channel, accelerating onboarding, reminders, and servicing, while unlocking measurable growth in policy renewals and premium collections.

01

Address fragmented communications across agents, policy management, and support

02

Unlock a scalable, compliant WhatsApp channel for lead qualification, onboarding, and reminders

03

Target higher renewal rates and faster premium collections through automated, timely messages

04

Bridge data silos with integrated CRM, policy management, and payment workflows

Prudential Zambia — Operational Pains

Explicitly name and frame the top operational pain points Prudential Zambia faces in current processes, establishing a clear baseline for a unified WhatsApp-driven engagement platform.

01

Fragmented customer communications across agents and channels

02

Manual policy onboarding and lead follow-ups slowing time-to-value

03

Premium reminders and renewal notices are not fully automated

04

Lack of centralized visibility into servicing, policies, and claims

05

Low agent productivity due to context switching across systems

06

Data silos between CRM, policy management, and support tools

Marichi WhatsApp Commerce Flow for Prudential Zambia

This dark_flow slide maps Prudential Zambia’s end-to-end customer journeys: from lead qualification and onboarding to premium reminders and centralized servicing. Each flow node represents a stage where WhatsApp, automation, and AI deliver real-time updates and frictionless interactions, reducing handling time and boosting renewals.

Marichi WhatsApp Capabilities for Prudential Zambia

Capabilities mapped to Prudential Zambia use cases: lead gen, onboarding, reminders, renewals, claims, support

This slide translates Prudential Zambia’s use cases into concrete Marichi capabilities. Each feature is tied to measurable outcomes in lead generation, policy onboarding, premium reminders, renewals, claims, and centralized support.

01

WhatsApp-led engagement with automation and AI

Orchestrates multi-channel conversations to qualify leads, nurture pipeline, and accelerate onboarding for Prudential Zambia

02
