

PRUDENTIAL ZAMBIA — HERO

Prudential Zambia: Unified WhatsApp Engagement with Marichi

Accelerating onboarding, renewals, and payments through a centralized, compliant omnichannel engine

Prudential Zambia transitions to a centralized WhatsApp-powered engagement and servicing layer. Marichi orchestrates lead generation, policy onboarding, renewal reminders, and claims updates, delivering a fast, compliant, and personalized customer journey across agents and channels.

Prudential Zambia: Digital Engagement Opportunity in Life Insurance

Regulatory alignment, rising digital expectations, and omnichannel demand drive urgency

In Zambia, customers increasingly expect seamless digital interactions for policy onboarding, renewals, and claims. Regulators are tightening governance around data, disclosure, and fair treatment, making centralized, compliant engagement essential. Prudential Zambia can capitalize on WhatsApp and omnichannel flows to accelerate onboarding, boost renewals, and improve collections while maintaining regulatory rigor.

Prudential Zambia — Channel and Manual-Workflow Pain Points

Pain points across Prudential Zambia’s current channels and workflows reveal fragmentation, slow onboarding, missed renewal opportunities, and limited visibility into policy status and customer journeys.

01

Customer communications are scattered across agents, WhatsApp, and legacy channels

02

Policy onboarding and lead follow-ups rely on manual, siloed workflows

03

Premium reminders and renewal messaging are not fully automated

04

Customer servicing and claims updates lack a centralized, real-time view

05

Data fragmentation leads to slow decisioning and inconsistent messaging

06

Agent productivity is hindered by context switching and duplicated effort

Prudential Zambia: Marichi WhatsApp Flow Overview

This slide illustrates how Prudential Zambia leverages Marichi WhatsApp Commerce Platform to orchestrate lead generation, policy onboarding, renewal reminders, and claims updates. Each flow is designed to deliver faster response times, centralized visibility, and compliant, channel-first customer interactions.

Prudential Zambia: WhatsApp Commerce Capabilities

Enterprise-grade capabilities aligned to Prudential Zambia's use cases

Showcase the core Marichi capabilities that enable Prudential Zambia to automate onboarding, reminders, and servicing while integrating with CRM, policy management, and payments for unified policy visibility.

01

Lead generation & qualification automation

Auto-engages prospects, qualifies leads, and routes to agents

02

Policy onboarding orchestration

Guided flows that capture data and create policies in minutes

03

Automated premium reminders & renewal campaigns

Timely notifications across channels to improve on-time payments

04

Omnichannel routing & centralized workflows

Unify conversations across agents, WhatsApp, and support tools

05

CRM, Policy Management, Payment Gateway integrations

Real-time data sync for policy status and payments

06

Analytics & real-time dashboards

Actionable insights into onboarding, renewals, and collections

Concentric WhatsApp Architecture for Prudential Zambia

A layered view of Prudential Zambia’s WhatsApp Commerce integration, showing how the Marichi platform sits at the center and interlocks with CRM, Policy Management, Payment Gateway, and Analytics to deliver compliant, omnichannel engagement.

Outer Ring

Prudential Zambia Channels – WhatsApp, web, and agents collaborate through a single orchestration layer

Inner Ring

Marichi Engine – Conversational orchestration, policy-aware workflows, AI-powered insights

Middle Ring

Integrations – CRM, Policy Management System, Payment Gateway, Support Platform, Analytics interoperate via standardized APIs

Access & Governance

Role-based controls, audit trails, and policy-compliant messaging across all touchpoints

Prudential Zambia: Renewal, Collections & Support Efficiency Impact

Process-driven impact metrics that tie Marichi WhatsApp Commerce Platform capabilities to renewals, premium collections, and support efficiency for Prudential Zambia.

- 01 **Step 1**
Onboarding acceleration reduces time-to-coverage from lead to policy issuance
- 02 **Step 2**
Proactive renewal campaigns drive higher on-time premium payments
- 03 **Step 3**
Centralized case visibility improves accuracy and speed of policy servicing
- 04 **Step 4**
Automated reminders and multi-channel updates decrease contact center load
- 05 **Step 5**
Real-time insights enable rapid decisioning on at-risk policies

BUSINESS IMPACT

Renewals uplift

On-time payments

Support efficiency

Prudential Zambia: Phased WhatsApp Commerce Deployment

A phased rollout plan for Prudential Zambia that progressively expands WhatsApp-based engagement across lead generation, onboarding, reminders, and policy servicing, with integration to CRM, Policy Management, and Payments. Each phase includes milestones, dependencies, risk mitigations, and measurable outcomes aligned to the client’s existing systems and regulatory requirements.

Phase 1 — Phase 1

Months 1–2

- Establish program governance and risk controls
- Map data lineage between CRM, Policy Management, and Payments
- Set integration skeleton and security baselines
- Define KPIs and success criteria

Phase 2 — Phase 2

Months 2–4

- Deploy lead qualification and onboarding WhatsApp flows
- Enable centralized agent view across channels
- Pilot with a focused product line
- Validate data quality and reconciliation processes

Phase 3 — Phase 3

Months 4–7

- Activate automated reminders for premiums and renewals
- Integrate payments gateway for end-to-end flow
- Expand to additional touchpoints (claims updates, servicing)
- Embed analytics dashboards for real-time visibility

Phase 4 — Phase 4

Months 7–12

- Scale across product lines and regions
- Enhance AI for personalized conversations and compliance
- Strengthen governance with audit trails and data controls
- Optimize ops with agent productivity metrics and feedback loops

PRUDENTIAL ZAMBIA — PRICING OUTLINE

Prudential Zambia: Transparent Pricing for Marichi WhatsApp Commerce

Clear investment aligned to budget, with feature-first value and timelines

This slide presents a transparent, itemized investment outline for deploying Marichi WhatsApp Commerce Platform at Prudential Zambia. It maps features to licensing, services, and delivery timelines to enable informed decisioning within the defined budget range.

Baseline license: Core omnichannel engagement, policy servicing, and onboarding flows

Tiered addons: Premium automation, claims updates, and advanced analytics

Implementation services: Phased rollout, data migration, and integration work

Ongoing support: SLA-backed operations, training, and knowledge base access

Timeline bands: 90/180/270-day deployment windows aligned to budget

Total cost of ownership: Clear capex vs. opex split with cost controls

CONFIDENTIAL & PROPRIETARY

Prudential Zambia: Operational Gains from WhatsApp Automation

Automation and centralized servicing unlock faster onboarding, smoother renewals, and improved collections

This slide quantifies the efficiency and outcome improvements Prudential Zambia can achieve by deploying automated, centralized servicing through Marichi WhatsApp Commerce Platform. It highlights concrete use cases, benchmarked impacts, and how integrated workflows reduce manual effort across policy onboarding, renewals, and payments.

- **Centralized servicing dashboard** Unified view of policy status, claims, and payments across channels
- **Automated onboarding and lead follow-ups** Faster policy issuance and higher conversion
- **Automated reminders for renewals and premium payments** Improved on-time collections
- **Agent productivity lift** Reduced context switching through integrated CRM and policy data
- **Compliance and governance** Consistent messaging aligned to regulatory standards

Prudential Zambia: End-to-End WhatsApp Use-Case Flows

This slide presents four end-to-end use-case flows on a dark 2×2 steps grid. Each cell maps Prudential Zambia’s WhatsApp-powered contact journey from first interaction through to outcome, tying back to policy onboarding, renewals, reminders, and claims updates.

1

Onboarding & Lead Qualification

Captured via WhatsApp, automated qualification, CRM handoff

2

Policy Onboarding Continuity

Seamless policy setup through guided conversations and e-sign where applicable

3

Renewals & Reminders

Proactive renewal prompts and on-time premium reminders appear in-channel

4

Claims & Support Updates

Real-time claims status and servicing messages with centralized visibility

Prudential Zambia: KPI Flow for WhatsApp Commerce Impact

Pilot targets and ROI for renewals, collections, and CSAT

This slide translates Prudential Zambia’s digital engagement initiative into measurable, insurance-specific KPIs. It demonstrates how the Marichi WhatsApp Commerce Platform accelerates policy onboarding, improves renewal timelines, and boosts premium collections while delivering centralized visibility.

PROJECTED IMPACT

+18%	Renewals attainment Renewals velocity: target +18% in 90 days post-pilot
+22%	Collections improvement On-time payments: target +22% collection rate during renewal window
+12	CSAT uplift CSAT uplift: target +12 points after first 60 days of omnichannel interactions

Concentric Architecture for Prudential Zambia: Governance, Compliance, and Security

Prudential Zambia’s governance, compliance, and security posture is embedded in a three-layer concentric architecture. Outer controls cover communications, middle layers enforce process integrity, and the inner core drives policy-level data protection and auditability across all WhatsApp-driven servicing and onboarding flows.

Outer Layer
Channel and communication governance with policyholder consent, data minimization, and secure messaging

Middle Layer
Process integrity and access controls across CRM, Policy Management, and Payments integrations

Inner Layer
Data protection, encryption at rest/in transit, and auditable activity for regulatory scrutiny

Policy and risk alignment
Automated policy mapping to regulatory requirements and enterprise standards

PRUDENTIAL ZAMBIA — CALL TO ACTION
