

PRUDENTIAL ZAMBIA — CHALLENGE

Prudential Zambia: Unified WhatsApp Engagement Transformation

Accelerating renewals, collections, and claims transparency with
Marichi

Prudential Zambia leverages Marichi WhatsApp Commerce Platform to unify policyholder, agent, and support communications. This slide introduces the tailored transformation to automate onboarding, reminders, and self-service across the policy lifecycle.

Prudential Zambia: Centralized WhatsApp Engagement Opportunity

Unlock cost-to-serve reductions and higher renewals with a unified WhatsApp channel

Prudential Zambia can accelerate its digital transformation by consolidating customer journeys—from lead generation and onboarding to renewals and claims—into a single WhatsApp-centric flow. This approach enables centralized visibility across policy management, payments, and support, driving faster onboarding, higher renewals, and improved CSAT.

Prudential Zambia — Current Operational Pain Points

01

Distributed customer communication across agents and channels

02

Manual workflows for policy onboarding and lead follow-ups

03

Reminders for premium payments and renewals are not fully automated

04

Lack of centralized visibility for customer servicing and claims

05

Siloed data across CRM, policy management, and support platforms

06

Limited ability to scale personalized cross-sell and upsell campaigns

Prudential Zambia: Marichi-Driven WhatsApp Commerce Flow

A single, dark-flow hero slide showing how Prudential Zambia leverages Marichi to orchestrate WhatsApp conversations with CRM, Policy Management, Payment Gateway, and Support analytics. The flow highlights automated onboarding, renewals, collections, and claims transparency through centralized data visibility.

Prudential Zambia: WhatsApp Capabilities Aligned to Use Cases

Enterprise-grade capabilities mapped to Prudential Zambia’s life insurance lifecycle

This slide maps Marichi WhatsApp Commerce Platform capabilities to Prudential Zambia’s core use cases: lead generation and qualification, policy onboarding, premium reminders, renewal campaigns, claims communication, customer support automation, and cross-sell/upsell campaigns. Each capability is described in the insurer’s terminology to ensure relevance and actionable alignment.

01

Lead gen & qualification

Automated initial engagement and routing to Prudential Zambia agents

02

Policy onboarding

WhatsApp-guided onboarding flows reducing manual steps for policyholders

03

Premium payment reminders

In-flow, automated reminders with seamless payment options

04

Policy renewal campaigns

Automated nudges and self-service renewal actions

05

Claims communication

Centralized, real-time status updates across channels

06

Customer support automation

AI-driven flows for common inquiries and routing

Concentric Architecture: Prudential Zambia & Marichi WhatsApp Commerce Platform

A layered view of how Prudential Zambia – empowered by Marichi – connects the WhatsApp channel to CRM, policy management, payment gateway, support, and analytics. This architecture enables unified customer journeys, real-time data synchronization, and scalable servicing across policy lifecycle moments.

Prudential Zambia: Unified WhatsApp Engagement Impact

This slide quantifies the expected business impact of deploying the Marichi WhatsApp Commerce Platform for Prudential Zambia, focusing on automated renewal reminders, improved collections, faster responses, and higher customer satisfaction.

- 01 **Step 1**
Initiate unified outreach across policy lifecycle to reduce duplicate touches
- 02 **Step 2**
Automate renewal reminders and self-service actions to lift renewal rates
- 03 **Step 3**
Centralize payments and status updates to accelerate collections
- 04 **Step 4**
Deliver real-time, AI-assisted support to improve CSAT and reduce handle time
- 05 **Step 5**
Track metrics in real-time to optimize campaigns and workflows

BUSINESS IMPACT

Prudential Zambia: 4–6, 8–12 Weeks to WhatsApp Transformation

phased milestones outline how Prudential Zambia will adopt the Marichi WhatsApp Commerce Platform across lead generation, onboarding, renewals, payments, and claims, with governance, risk controls, and measurable outcomes at each stage.

Phase 1 — Phase 1

Weeks 1–4

- Establish program governance and risk controls
- Integrate Marichi with CRM, Policy Management, and Payments
- Draft data privacy, security, and change-management plan
- Configure core onboarding and lead-qualification flows

Phase 2 — Phase 2

Weeks 5–8

- Launch WhatsApp onboarding with guided policy activation
- Automate premium reminders and self-service updates
- Enable centralized case routing and agent handoffs
- Train agents and contact center on new workflows

Phase 3 — Phase 3

Weeks 9–12

- Activate renewal campaigns and in-flow payment options
- Roll out centralized claims status updates
- Introduce cross-sell/upsell messaging tied to policy context
- Measure adoption, first-contact resolution, and CSAT

Phase 4 — Phase 4

Beyond Week 12

- Scale to additional policy types and regions in Zambia
- Optimize personalization and nudges using AI insights
- Expand analytics and dashboards for executives
- Institutionalize continuous improvement cycles

CONFIDENTIAL & PROPRIETARY

Prudential Zambia: 4-Step WhatsApp Flows for Core Use Cases

This slide maps Prudential Zambia's primary use cases to concrete flow steps within the Marichi WhatsApp Commerce Platform. Each flow is designed to reduce manual work, centralize visibility, and drive measurable outcomes for renewals, payments, onboarding, and claims updates.

1

1) Lead generation & qualification flow

From initial contact to qualified prospect routed to agents

2

2) Policy onboarding flow

Guided onboarding in WhatsApp with data capture and activation

3

3) Premium payment reminder flow

Automated reminders with in-flow payment options

4

4) Policy renewal flow

Automated nudges and self-service renewal actions

Prudential Zambia: WhatsApp Commerce KPI Flow

Centralized engagement drives renewals, collections, and faster resolutions

This slide quantifies the ROI and operational efficiency from Prudential Zambia's shift to a unified WhatsApp-driven engagement model. It maps policy lifecycle activities to measurable cost-to-serve, renewal uplift, and time-to-resolution improvements.

PROJECTED IMPACT

- 28%** **Cost-to-Serve Reduction**
Cost-to-serve reduction from consolidated channels and automated flows
- +15%** **Renewal Uplift**
Renewal uplift driven by timely, in-channel reminders and self-service options
- 40%** **Time-to-Resolution Reduction**
Time-to-resolution improvement through centralized visibility and streamlined routing

Governance, Change Management, and Compliance—Prudential Zambia

This timeline outlines phased governance, training, and compliance activities tailored for Prudential Zambia’s WhatsApp-based transformation. It highlights risk mitigation steps, stakeholder ownership, and audit-ready controls to ensure a compliant, user-centric rollout across policy lifecycle touchpoints.

Phase 1 — Phase 1

Months 1–2

- Establish Governance: Steering Committee and policy approvals
- Define success metrics and risk appetite
- Draft data privacy and access controls specific to Zambia
- Set initial training plans and kickoff communications

Phase 2 — Phase 2

Months 3–4

- Map regulatory requirements for policy data and payments
- Implement risk controls and audit trails in WhatsApp flows
- Roll out agent training and policyholder communications playbooks
- Pilot security and privacy testing across core journeys

Phase 3 — Phase 3

Months 5–6

- Launch controlled pilot in select regions/channel segments
- Monitor adherence to SLAs and data governance policies
- Refine incident response and remediation procedures
- Prepare for full-scale rollout with risk dashboards

Phase 4 — Phase 4

Months 7–9

- Full deployment across agents, policy management, and payments
- Ongoing training, change communications, and coaching
- Continuous compliance audits and improvements
- Executive review and post-implementation governance handoff

Prudential Zambia: Marichi Enterprise Differentiation

A focused comparison showing how Prudential Zambia leverages Marichi to replace fragmented, manual workflows with centralized, automated WhatsApp-driven engagement tailored to policy lifecycles.

Capability	Old Way	New Way
Lead generation	❌ Manual outreach leads to slow onboarding	✅ Automated, lifecycle-aware qualification
Policy onboarding	❌ Paper-based or disconnected flows	✅ In-WhatsApp guided onboarding with data capture
Premium reminders	❌ Inconsistent timing across channels	✅ Timely, in-flow reminders with seamless payments
Renewal campaigns	❌ Manual follow-ups by agents	✅ Automated renewal nudges and self-service actions
Claims updates	❌ Delayed status visibility	✅ Centralized, real-time updates
Support routing	❌ Siloed channels and handoffs	✅ AI-powered routing with unified case view

PRUDENTIAL ZAMBIA — EXECUTIVE QUOTE

Prudential Zambia: Unified WhatsApp Engagement for Renewal, Collections, and Claims

Partnering to accelerate onboarding, automate renewals, and centralize servicing through Marichi WhatsApp Commerce Platform

Executive takeaway: The Marichi WhatsApp Commerce Platform enables Prudential Zambia to move from fragmented, manual workflows to a unified, automated engagement model that drives higher renewal rates, improved collections, and faster claims transparency across Zambia.

Executive sign-off on expanding WhatsApp as the primary conversational channel
Commitment to centralize policy, payment, and support workflows in a single view
Agree on next-phase milestones: onboarding, renewals, and claims visibility
