

PRUDENTIAL ZAMBIA — COVER

Prudential Zambia: WhatsApp-Driven Customer Engagement Transformation

Marichi WhatsApp Commerce Platform — Enterprise-Grade,
Regulated, Multi-Channel

A bold opening slide that positions Prudential Zambia to own the primary conversational channel with customers and agents via WhatsApp, unlocking end-to-end engagement across onboarding, payments, and support.

Prudential Zambia: Centralized WhatsApp Engagement Opportunity

A unified, compliant WhatsApp-based engagement hub can close gaps in inquiry handling, onboarding, renewals, payments, and support. By centralizing conversations, Prudential Zambia can deliver faster responses, improve first-contact resolution, and drive higher renewal and payment completion rates.

Prudential Zambia — Current Customer Engagement Pain Points

This slide highlights the four key challenges Prudential Zambia faces in customer communications, policy onboarding, payments, and servicing. Each point reflects the real-world friction observed in current workflows and multi-channel interactions.

01

Lead intake & qualification are scattered across agents and channels

02

Policy onboarding relies on manual workflows and data entry

03

Premium reminders and renewals are not fully automated across segments

04

Customer servicing and claims updates lack centralized visibility

Prudential Zambia: Marichi WhatsApp Flow for Onboarding, Renewals & Payments

A dark-flow hero slide illustrating how Prudential Zambia leverages Marichi to guide customers through onboarding, renewals, and payment journeys with centralized visibility and automated workflows.

Prudential Zambia: Marichi WhatsApp Capabilities by Use Case

This slide maps Prudential Zambia’s use cases to Marichi WhatsApp Commerce Platform capabilities, illustrating how each capability enables onboarding, engagement, payments, and servicing at scale with policy-aware automation.

01

Lead capture & qualification

Centralizes inquiries via WhatsApp, auto-qualifies with policy context

02

Automated policy onboarding flows

Guided conversations, auto-fill data, policy activation

03

Automated premium reminders & renewals

Timely, compliant notices across segments

04

Centralized servicing & claims updates

Unified view across channels with real-time status

05

CRM, policy management, payments integration

End-to-end data flow for analytics and actions

06

Analytics & reporting

Real-time dashboards on engagement, conversions, payments, and SLAs

Concentric Architecture for Prudential Zambia

This slide depicts the three concentric rings of Prudential Zambia's Marichi integration: outer ring shows customer touchpoints and data ingress, middle ring represents orchestration and workflow automation, and inner ring contains the AI and analytics core that powers policy-aware conversations, compliant payments, and proactive support.

Outer Ring

Customer Touchpoints and Data Ingress – channels from WhatsApp to CRM feed, policy system, and payment gateway

Inner Ring

Intelligence Core – policy-aware decisioning, compliance controls, analytics, and optimization engine

Middle Ring

Automation Orchestration – guided onboarding, automated reminders, case routing, and SLA-driven responses

Security & Compliance

End-to-end encryption, role-based access, audit trails, and regulatory policy checks

Prudential Zambia: Process Donut — Engagement, Renewals & Collections

This slide translates Prudential Zambia’s capabilities into measurable outcomes, highlighting how unified WhatsApp engagement accelerates onboarding, boosts renewals, and improves premium collections through automated, compliant workflows.

- 01 **Lead capture to underwriting**
Onboarding flow reduces manual data entry by automating guided conversations
- 02 **Policy activation speed**
Faster activation leading to quicker time-to-first-claim readiness
- 03 **Payment reminders**
Proactive renewal and due reminders increase on-time payments
- 04 **Channel visibility**
Centralized servicing enables faster response times and policy status updates
- 05 **Agent productivity**
Reduced context switching frees agents for higher-value interactions

BUSINESS IMPACT

Phased Implementation Timeline for Prudential Zambia

This timeline maps Prudential Zambia’s adoption of Marichi WhatsApp Commerce Platform across policy onboarding, renewals, payments, and claims support. Each phase defines governance, risk controls, data flows, and critical dependencies to minimize disruption and maximize early value.

Phase 1 — Foundations & Compliance

Months 1–2

- Data model alignment between CRM and Policy Management
- Regulatory controls and consent architecture established
- Initial integration with core systems (CRM, Policy, Support)

Phase 2 — Lead Capture & Onboarding

Months 2–4

- WhatsApp-based lead intake and qualification enabled
- Guided onboarding conversations with data validation
- First policy activation flow tested in a controlled pilot

Phase 3 — Payments & Renewals

Months 4–6

- Automated reminder campaigns across segments
- Payment gateway hooks and reconciliation view
- Centralized status visibility for agents and customers

Phase 4 — Servicing & Claims

Months 6–8

- Unified inquiries view across channels
- Claims updates and SLA-backed responses
- Agent productivity tools integrated into workflow
