

PRUDENTIAL ZAMBIA — TRANSFORMATION OBJECTIVE

Prudential Zambia: Unifying Customer Engagement with Marichi WhatsApp Commerce

A unified, AI-assisted WhatsApp experience for onboarding, renewals, and claims

Prudential Zambia aims to consolidate customer communications, automate policy onboarding and premium reminders, and centralize servicing and claims across channels. This transformation, powered by Marichi WhatsApp Commerce Platform, will deliver faster onboarding, proactive renewals, and a seamless support experience at enterprise scale.

Prudential Zambia: Unified WhatsApp Engagement Opportunity

A single, compliant channel to accelerate onboarding, renewals, and service for policyholders

Unified WhatsApp engagement enables Prudential Zambia to consolidate fragmented communications, streamline policy onboarding, automate reminders, and centralize servicing and claims with multilingual, compliant interactions. This narrative quantifies the impact on onboarding efficiency, engagement, and premium collections to justify a rapid transformation.

Prudential Zambia: Key Pain Points Today

Directly map Prudential Zambia's current state: fragmented communication, manual onboarding, gaps in reminder automation, and lack of centralized visibility across policy, claims, and servicing.

Customer communication distributed across agents and channels

Policy onboarding and lead follow-ups involve manual workflows

Premium payment reminders and renewal communication are not fully automated

Customer servicing and claims communications lack centralized visibility

How Prudential Zambia Benefits from Marichi WhatsApp Commerce

LEFT PANEL: PAIN POINTS

- **Left**
Fragmented communications across agents and channels create inconsistent policyholder experiences
- **Left**
Manual policy onboarding and lead follow-ups slow time-to-value for agents
- **Left**
Non-automated premium reminders hinder on-time payments and renewals

RIGHT PANEL: MARICHI SOLUTION

- **Left**
Lack of centralized visibility into servicing and claims slows resolutions
- **Right**
Marichi consolidates journeys inside WhatsApp, unifying onboarding, reminders, and support
- **Right**
Native CRM and Policy System integrations provide a single source of truth

Prudential Zambia: Use Case Flows for WhatsApp Commerce

A 2×2 grid of practical use-case steps showing how Prudential Zambia leverages Marichi WhatsApp Commerce Platform to drive onboarding, policy updates, reminders, and claims support with AI-driven outcomes.

Concentric WhatsApp Architecture for Prudential Zambia

A three-layer architecture that visually communicates how Marichi WhatsApp Commerce Platform sits at the center, with policy, CRM, payment, and analytics systems forming concentric rings around Prudential Zambia’s customer journeys.

Outer Ring
Customer Touchpoints — WhatsApp interactions across onboarding, reminders, servicing, and claims

Middle Ring
Integration Layer — CRM, Policy Management System, Payment Gateway, Support Platform

Inner Ring
Intelligence Core — AI-driven conversations, compliance guardrails, and analytics

Seamless Data Flow
Real-time context travels from WhatsApp to systems and back to the customer

Prudential Zambia: Phased WhatsApp Commerce Implementation

A practical, phased plan aligned to Prudential Zambia’s priorities: unify communications, automate onboarding and reminders, and centralize servicing. Each phase identifies owners, milestones, and dependencies to ensure rapid value and risk-aware adoption.

Phase 1 — Foundation

Months 1–2

- Set up WhatsApp as Prudential Zambia's primary conversational channel
- Integrate CRM and Policy Management System for centralized data
- Define data governance, consent capture, and multilingual support

Phase 2 — Onboarding & Reminders

Months 2–4

- Implement automated policy onboarding journeys and lead follow-ups
- Deploy premium reminders and in-chat payment prompts
- Validate regulatory compliance and audit trails

Phase 3 — Claims & Support

Months 4–6

- Centralize claims communications within WhatsApp flows
- Launch multilingual support templates and agent handoffs
- Enable case continuity across channels

Phase 4 — Personalization & Growth

Months 6–9

- Introduce AI-powered contextual conversations for policy servicing
- Launch cross-sell/upsell campaigns within journeys
- Fine-tune intents with real data and feedback loops

Prudential Zambia & Marichi — Pilot Governance & Success Metrics

A tightly-scoped pilot governance model with clear success metrics to accelerate Prudential Zambia’s journey to a unified, AI-assisted WhatsApp engagement engine for onboarding, renewals, and service.

Old Way

- ✗ **Executive Sponsorship** — Commitment from Prudential Zambia leadership to sponsor the pilot and resolve cross-functional dependencies
- ✗ **Scope & Boundaries** — Defined use cases (onboarding, reminders, claims updates) with measurable KPIs and exit criteria
- ✗ **Data & Compliance** — Agreed data sharing, privacy controls, and regulatory alignment for multilingual customer engagements

New Way

- ✓ **Governance Cadence** — Regular steering, risk reviews, and decision rights to keep the pilot on track
- ✓ **Measurement Framework** — Pre-defined success metrics, dashboards, and reporting cadence
- ✓ **Risk Mitigation** — Identified risks with mitigation plans and contingency options
