

PRUDENTIAL ZAMBIA — COVER

Prudential Zambia: Transforming Engagement with Marichi WhatsApp Commerce

Centralized, compliant, enterprise-grade WhatsApp engagement for
life insurance and financial services

Introducing a transformative WhatsApp engagement solution tailored for Prudential Zambia, unifying policy onboarding, renewals, collections, and customer servicing into a single, auditable channel.

Prudential Zambia: Digital Engagement Market Momentum

Centralized, WhatsApp-driven engagement is now critical to accelerate onboarding, renewals, and servicing for policyholders

In Zambia, customers increasingly expect real-time, convenient interactions through digital channels. WhatsApp is the dominant personal messaging channel and is quickly becoming the preferred conduit for policy onboarding, premium reminders, claims updates, and servicing. Regulatory expectations for auditable, compliant communications are shaping how insurers such as Prudential Zambia engage policyholders, agents, and brokers at scale.

- 01 WhatsApp adoption in financial services**
Rising daily active users and higher engagement in policy servicing
- 02 Policy onboarding and renewals moving online**
Automation reduces cycle times and improves SLA adherence
- 03 Premium collection through digital channels**
Fewer missed payments, more consistent cash flow
- 04** Unified customer view across CRM and policy systems enables targeted cross-sell and upsell
- 05** Regulatory-compliant messaging becomes a differentiator in customer trust
- 06** Demand for auditable, end-to-end communication flows across lifecycle stages

Prudential Zambia — Key Pain Points Driving WhatsApp Transformation

Prudential Zambia faces fragmented customer communication across agents and channels, manual onboarding and follow-ups, and inconsistent premium reminders. These challenges hinder timely renewals, reduce engagement quality, and strain agent workflows, creating risk to cash collection and customer satisfaction.

Customer communications spread across agents and channels

Manual onboarding and lead follow-ups slow onboarding speed

Premium reminders and renewal messages are not fully automated

Customer servicing and claims updates lack centralized visibility

Data fragmentation across CRM, Policy Management System, and Support Platform

Prudential Zambia: Marichi WhatsApp Engagement Architecture

THE CHALLENGE

- **Left**
Fragmented channels across agents and systems creating delays in onboarding and renewals
- **Left**
Manual, time-intensive workflows for policy onboarding and reminders
- **Left**
Disparate data across CRM, Policy Management System, and Support Platform

THE SOLUTION

- **Right**
Centralized, auditable WhatsApp engagement with native renewal and claims workflows
- **Right**
Automated onboarding, renewal reminders, and servicing flows
- **Right**
Seamless CRM/Policy System integrations with AI-powered guidance

Marichi Capabilities for Prudential Zambia

Capabilities mapped to Prudential Zambia use cases

This slide highlights the core capabilities of Marichi WhatsApp Commerce Platform that directly address Prudential Zambia’s use cases: lead generation and qualification, policy onboarding, premium reminders, renewals, claims communication, and supported servicing. Each capability is presented as a concrete, implementable flow that ties to existing systems (CRM, Policy Management, Payments, Support).

01

Unified WhatsApp Engagement

Orchestrates conversations across leads, policy onboarding, reminders, and servicing in a single, auditable thread

02

Automated Onboarding Flows

Guides prospects through policy setup with real-time data capture and CRM/policy system synchronization

03

Premium Reminders & Renewal Campaigns

Timed, compliant messages that drive on-time payments and policy renewals

04

Claims & Servicing Channel

Real-time status updates, document requests, and escalation paths within one channel

05

Cross-Platform Data Continuity

Bi-directional data sync between CRM, Policy Management, and Analytics for unified customer view

06

AI-Powered Guidance & Compliance

Flow-driven decisions, policy-friendly prompts, and auditable logs aligned to regulatory needs

Concentric Architecture of Marichi for Prudential Zambia

A three-layer concentric architecture shows how Marichi weaves Prudential Zambia’s CRM, Policy Management System, Payments, and Support into a single, auditable WhatsApp conversation layer. This design enables real-time servicing, seamless onboarding, and proactive renewals across channels.

Prudential Zambia: Phased WhatsApp Transformation Rollout

This slide presents a Month-by-Month rollout plan for Prudential Zambia, mapping milestones, owners, and success criteria to ensure a smooth, compliant, and measurable deployment of the Marichi WhatsApp Commerce Platform across core insurance workflows.

Phase 1 — Foundation

Months 1–3

- Establish WhatsApp channel governance and compliance controls
- Migrate core touchpoints from fragmented channels to a centralized flow
- Integrate CRM and Policy Management System for unified data
- Pilot onboarding flows with limited policy types and agents

Phase 2 — Automation & Onboarding

Months 4–6

- Enable automated onboarding journeys and user verification
- Roll out renewal and premium payment reminders via WhatsApp
- Introduce claims status updates with centralized visibility
- Refine data continuity and audit trails across systems

Phase 3 — Scale & Analytics

Months 7–9

- Expand cross-sell/upsell flows within journeys
- Enhance analytics dashboards and SLA reporting
- Optimize agent workflows with guided patterns
- Strengthen regulatory and data privacy controls

Phase 4 — Maturity & Handover

Months 10–12

- Full deployment across product lines and segments
- Operationalize continuous improvement cycles
- Formalize BAU governance and training for staff
- Publish success metrics and lessons learned for leadership
