

CONFIDENTIAL PROPOSAL

Transforming Prudential Zambia's Customer Engagement with WhatsApp AI

Powered by Marichi Commerce Platform

A strategic roadmap to deploy conversational AI across 2.1M policyholders.

MARKET CONTEXT

Zambia's Digital Insurance Opportunity Is Now

Mobile-first penetration has hit 78%. Insurers moving to WhatsApp-first servicing are capturing 3x more renewals than traditional channels.

- Lead Capture: Automated WhatsApp forms replace paper-based intake reducing errors by 80%
- Policy Onboarding: End-to-end digital onboarding in under 10 minutes via conversational flows
- Premium Reminders: AI-driven renewal nudges reduce lapse rate by 35% across segments
- Claims Support: Guided claims intake cuts resolution cycle from 7 days to 18 hours

CASE STUDY

How Sanlam Kenya Reduced Churn by 28% in 90 Days

By deploying automated WhatsApp renewal flows, Sanlam Kenya eliminated manual follow-up calls and cut policy lapse rates dramatically.

Lead Capture — Automated WhatsApp forms replace paper-based intake reducing errors by 80%

Policy Onboarding — End-to-end digital onboarding in under 10 minutes via conversational flows

Premium Reminders — AI-driven renewal nudges reduce lapse rate by 35% across segments

Customer CSAT

12-Month Deployment Roadmap

Phase 1 — Foundation & Integration

Months 1–3

- API setup, CRM sync, team onboarding

Phase 2 — Pilot Launch

Months 4–6

- 2 use cases go live — onboarding + renewal reminders

Phase 3 — Full Rollout

Months 7–10

- All 6 use cases active across agent network

Phase 4 — AI Optimisation

Months 11–14

- Predictive scoring and advanced campaign management

TECHNICAL ARCHITECTURE

Marichi Platform Architecture

A cloud-native, API-first architecture connecting every customer touchpoint.

01 WhatsApp Business API
Meta-certified gateway with 99.95% uptime SLA

02 AI Orchestration Layer
NLP intent detection + flow routing engine

03 Integration Hub
Pre-built connectors for Salesforce, SAP, Core Banking

04 Data & Analytics
Real-time dashboards with cohort and funnel analysis

05 Compliance Vault
End-to-end encryption, audit logs, GDPR controls

Marichi vs. Legacy Communication Platforms

Capability	Feature	Marichi
WhatsApp Native Integration	✔ Full API	✗ Limited or none
AI Routing & Intent Detection	✔ Built-in NLP	⚠ Add-on cost
Pre-built Insurance Flows	✔ 40+ templates	✗ Build from scratch
Regional Data Residency	✔ SADC-compliant	⚠ Global only
Implementation Time	✔ 6 weeks	✗ 6–12 months

INVESTMENT

Flexible Pricing Designed for Enterprise Scale

Platform fee + usage-based messaging — zero per-seat licence costs.

Starting from \$3,200/month for up to 500,000 interactions. Volume pricing available for 1M+ monthly interactions.

Six Core Capabilities That Drive Results

Everything you need to automate customer engagement end-to-end.

01

Omnichannel Inbox

Unified view of every customer conversation across WhatsApp, SMS, email

02

AI-Powered Routing

Intent detection routes queries to right team with zero manual triage

03

Smart Campaigns

Segment-targeted broadcast campaigns with real-time delivery analytics

04

CRM Integration

Bi-directional sync with Salesforce, HubSpot and policy management systems

05

Compliance Engine

GDPR and local data-residency controls baked into every message flow

06

Analytics Dashboard

Live KPI monitoring with cohort-level engagement and conversion drilldowns

Prudential Zambia: Current Customer Engagement Pain Points

Four critical friction points slowing growth and increasing operational cost across the policyholder lifecycle.

Fragmented Channels

Lead intake scattered across agents, branches, and manual forms with no unified view

Manual Onboarding

Policy setup requires 3–5 days of back-and-forth paperwork and agent intervention

Lapsed Renewals

Premium reminders rely on outbound calls — 34% lapse rate for mid-segment policies

Servicing Delays

Claims queries handled by email and phone with 7-day average resolution time

Temenos, Oracle FLEXCUBE, Mambu

POLICY ADMIN

RiskPoint, Guidewire, Duck Creek

MESSAGING

WhatsApp Business API, SMS, Email, RCS

ANALYTICS

Tableau, Power BI, Looker, native dashboards

SECURITY & COMPLIANCE

GDPR, POPIA, ISO 27001, SOC 2

MARKET DATA

WhatsApp Is the Dominant Channel Across SADC Insurance Markets

Open rates on WhatsApp business messages average 94% versus 18% for email. Insurers ignoring this channel are leaving renewal revenue on the table.

- **Reach** WhatsApp reaches 78% of Zambia's smartphone users
- **Engagement** 94% average open rate vs 18% for email campaigns
- **Conversion** 3.2x higher policy renewal rate on WhatsApp vs. outbound call
- **Cost** 60% lower cost-per-interaction than traditional call centre

CHANNEL

Marichi Connects Every Touchpoint in the Customer Lifecycle

A unified platform replacing fragmented point solutions and manual agent workflows.

From first inquiry to annual renewal, Marichi orchestrates the entire insurance customer journey on WhatsApp — with AI ensuring every interaction is personalised, compliant, and conversion-optimised.

EXECUTIVE ENDORSEMENT

The Competitive Window Is Now

*WhatsApp-first insurers in Kenya and Ghana are already capturing 30% more renewals.
Prudential Zambia can lead this shift in the Zambian market — or follow it.*

First-mover advantage in Zambia's WhatsApp insurance market

Full deployment achievable within 90 days

Dedicated Marichi implementation team assigned from day one

EXECUTIVE ENDORSEMENT

CONFIDENTIAL & PROPRIETARY

Marichi's Four-Step Activation Framework

A structured deployment methodology proven across 40+ enterprise insurance deployments.

1

Discover & Design

Deep-dive workshops to map your customer journeys and identify top 3 automation use cases with highest ROI potential

3

Test & Train

Parallel UAT with your team, compliance review of all flows, agent training on the unified inbox and escalation protocols

2

Build & Integrate

Our engineers connect Marichi to your CRM, policy admin, and core banking systems using pre-built connectors — no custom dev required

4

Launch & Optimise

Go-live with real-time KPI monitoring, weekly performance reviews, and continuous AI model improvement over 90 days

The Cost of Staying with Legacy Systems

Capability	Without Solution	With Our Solution
Customer Onboarding	5-day manual process	WhatsApp flow completes in 8 minutes
Renewal Reminders	Outbound call centre at \$4.20/contact	Automated WhatsApp at \$0.12/contact
Claims Intake	7-day email thread average	Guided WhatsApp form resolved in 18 hours
Agent Productivity	40 interactions/day per agent	340 interactions/day with AI assist
CSAT Score	3.1 / 5 average	4.7 / 5 on WhatsApp-first journeys

End-to-End WhatsApp Commerce Flow

From first contact to closed policy — a fully automated, AI-powered conversation pipeline.

Three-Layer Marichi WhatsApp Commerce Architecture

A platform built in concentric layers — each layer amplifying the capabilities below it.

Policy Bot

Guides new customers through onboarding in under 8 minutes via WhatsApp

Claims Intake

Structured claims form via WhatsApp cutting resolution from 7 days to 18 hours

Renewal Engine

Automated premium reminders with payment link — zero agent intervention

CRM Sync

Every interaction logged to Salesforce in real time with full audit trail

Why Marichi Beats Every Alternative for Prudential Zambia

STATUS QUO

- **Fragmented Channels**
Customer data siloed across 4+ systems with no single view
- **Manual Onboarding**
Agents spend 3 hours per policy on data entry and follow-up
- **High Lapse Rate**
34% policy lapse rate due to inconsistent renewal communication

WITH MARICHI

- **Unified Platform**
Single WhatsApp inbox with full customer history and AI context
- **8-Minute Onboarding**
End-to-end digital policy enrollment with zero paperwork
- **Automated Renewals**
AI-triggered reminders reduce lapse rate to under 11% in 90 days
